go textbooks: Interpersonal Meaning in Multimodal English Textbooks Yumin Chen, 2022-03-10 Exploring multimodality in English language teaching textbooks, this book focusses on how language and image are co-deployed within these resources in order to create and convey interpersonal meaning. Presenting cutting-edge research in appraisal studies and multimodal discourse analysis, Yumin Chen uses systemic functional linguistics and social semiotics to investigate how different voices are introduced and aligned inter-modally in textbooks, extending the appraisal systems of engagement and graduation across language and image. The book also demonstrates how linguistic and visual semiotic resources co-instantiate attitude, paying special attention to the attitudinal dimension of curriculum goals for school students of different ages. Furthermore, it examines how different kinds of coding orientation are deployed in various educational contexts and different constituent genres. Demonstrating how the linguistic and semiotic theories can be adapted to analyze multimodal texts across language and image, *Interpersonal Meaning in Multimodal English Textbooks* offers new perspectives on how to employ multimodal resources to enhance the teaching and learning of English as a foreign language.

go textbooks: *Books in the Digital Age* John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive 'logic' or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had, and continues to have, a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. *Books in the Digital Age* will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers, and to anyone interested in books and their future.

go textbooks: **The Effects of Intellectual Property Law in Writing Studies** Karen J. Lunsford, James P. Purdy, 2019-12-06 This book documents the intellectual property experiences of writing studies scholars and challenges naturalized ways of responding to intellectual property concerns. Analyzing results of a nationwide survey and semi-structured interviews to examine ways decisions about intellectual property (IP) during academic knowledge-making are mediated by histories of enculturation, ethical lenses, and IP sponsors, the book: Identifies and illustrates a range of ethical stances that academics might adopt in regard to IP and the range of human, institutional, and technological sponsors that can mediate IP decisions; Provides evidence that IP affects all of the processes of academic knowledge-making, not just the final product; Offers heuristic questions that academics can and should ask throughout their teaching, research, and editing to make proactive IP decisions. The book is an essential read for academics working in writing studies and the humanities as well as those interested in IP. This text could also be used in graduate student training in writing studies and related disciplines.
