csu bookstore textbooks: Textbooks in Academic Libraries Chris Diaz, 2018-12-03 Shortly after the syllabi are posted, and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are

many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core-course textbook reserve program; funding sources for starting or piloting a program; using aggregated enrollment, grade, and textbook cost data to identify high impact courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings, and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

csu bookstore textbooks: Learning Innovation and the Future of Higher Education Joshua Kim, Edward J. Maloney, 2020-02-11 Giving higher education professionals the language and tools they need to seize new opportunities in digital learning. A quiet revolution is sweeping across US colleges and universities. As schools rethink how students learn - both inside and outside the classroom - technology is changing not only what should be taught but how best to teach it. From active learning

and inclusive pedagogy to online and hybrid courses, traditional institutions are leveraging their fundamental strengths while challenging long-standing assumptions about how teaching and learning happen. At this intersection of learning, technology, design, and organizational change lies the foundation of a new academic discipline of digital learning. Coalescing around this new field of study is a common critical language, along with a set of theoretical frameworks, methodological practices, and shared challenges and goals. In *Learning Innovation and the Future of Higher Education*, Joshua Kim and Edward Maloney explore the context of this new discipline, show how it exists within a larger body of scholarship, and give examples of how this scholarship is being used on campuses. What Kim and Maloney demonstrate in this foundational text is an understanding that change is a complex dynamic between what happens in the classroom and the larger institutional structures and traditions at play. Ultimately, the authors make a compelling case not only for this turn to learning but also for creating new pathways for nonfaculty learning careers, understanding the limits of professional organizations and social media, and the need to establish this new interdisciplinary field of learning innovation.

csu bookstore textbooks: *Practicing Social Justice in Libraries* Alyssa Brissett, Diana Moronta, 2022-09-30 *Practicing Social Justice in Libraries* provides practical strategies, tools, and resources to library and information workers and students who wish to drive change in their classrooms, institutions, and communities and incorporate social justice into their everyday practice. With contributions from a diverse group of librarians, who have experience working in different types of institutions and roles, the book showcases the actions information professionals, largely from historically marginalized groups, are taking to create a more socially responsible environment for themselves and their communities. The chapters reflect on personal experiences, best practices for programming, professional development, effective collaboration, building inclusive community partnerships, anti-racist practices in the classroom, and organizational culture. Exploring how and why library workers are incorporating anti-racist and anti-oppressive work within their everyday roles, the book demonstrates that library workers are increasingly sending messages of protest and advocating for equity, justice, and social change. Highlighting their experiences of marginalization and exclusion, contributors also reflect upon the impact social justice work has on their mental health, careers, and personal lives. *Practicing Social Justice in Libraries* is essential reading for library and information workers and students who are searching for practical ways to implement more inclusive practices into their work

csu bookstore textbooks: *Meet the Food Radicals* F. Bailey Norwood, Tamara L. Mix, 2019-02-27 The food system has changed considerably in the last century. Horsepower was replaced by machine, better crop breeding programs helped usher in the Green Revolution, and problems of malnutrition began to run parallel with those of obesity. Despite changes, many of the problems we face remain the same. Farms continue to lose soil, and low income households still have difficulty acquiring healthy food. Add to these challenges a host of new ones. Globalization has caused some agricultural communities to feel threatened. Everyone recognizes problems of malnutrition, obesity and food sustainability, but many disagree on solutions. One thing is certain: confronting both familiar and new challenges will lead to radical changes in the food system. Though the exact form of radical change is unknown, this book looks to a host of candidates by interviewing the people who champion them. We are winning the battle against soil erosion through new no-till farming methods. Progress is being made in food sustainability by a spectrum of new innovations, but also a return to traditional farming techniques. New innovations include robots on the farm, advances in molecular biology, and alternative protein sources. As we embrace the farming strategies of our ancestors, we see farms returning to polycultures, local food systems, and food sovereignty. This book gains insight from interviews with twenty-seven individuals who are either creating or proposing radical

changes in how food is produced and distributed. An eclectic group ranging from farmers to activists to spiritual gurus, they are the most interesting people you have never met. By getting to know each radical personally we can better access their voices and visions to understand both the problems and likely solutions to today's most pressing food problems.

csu bookstore textbooks: The Importance of Being Earnest Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2015-10-15 Over one hundred presentations from the thirty-fourth Charleston Library Conference (held November 5-8, 2014) are included in this annual proceedings volume. Major themes of the meeting included patron-driven acquisitions versus librarian-driven acquisitions; marketing library resources to faculty and students to increase use; measuring and demonstrating the library's role and impact in the retention of students and faculty; the desirability of textbook purchasing by the library; changes in workflows necessitated by the move to virtual collections; the importance of self-publishing and open access publishing as a collection strategy; the hybrid publisher and the hybrid author; the library's role in the collection of data, datasets, and data curation; and data-driven decision making. While the Charleston meeting remains a core one for acquisitions, serials, and collection development librarians in dialog with publishers and vendors, the breadth of coverage of this volume reflects the fact that the Charleston Conference is now one of the major venues for leaders in the information community to shape strategy and prepare for the future. Over 1,600 delegates attended the 2014 meeting, ranging from the staff of small public library systems to CEOs of major corporations. This fully indexed, copyedited volume provides a rich source for the latest evidence-based research and lessons from practice in a range of information science fields. The contributors are leaders in the library, publishing, and vendor communities.
