finance textbooks: *Inclusive and Sustainable Finance* Atul K. Shah, 2022-10-25 Instead of being a means to an end, finance has become an end in itself and a master of economic actions and priorities. The role of ethics, culture and faith has been diminished by neoliberalism over the last forty years, such that we are living through a profound moral crisis, rising inequality and plutocracy. This practice is destroying the social and trust capital that already exists and is in need of replenishing. This pioneering book draws upon diverse wisdom traditions and their current living business practices to show that not only is another world possible, but it is actually hiding in plain sight. The author argues that our obsession with technocratic economic science has disabled us from exposing the organic and culturally diverse practices of finance. The climate and inequality crises demand new institutional and cultural solutions to transform behaviour and heal the planet. Through real-life examples and case studies, this book illustrates and develops a new organic theory of finance which can be taught and shared all over the world, helping society to prepare for a sustainable and inclusive future. It provides valuable empowerment to experts and professionals from different cultures and traditions to write about their own finance practices and in turn encourage their students and communities to embrace sustainability ideals. There is a global audience for this book, given its multicultural outlook and the diversity of narratives and case studies, from entrepreneurs to MBA students and leaders in accounting and finance. It also has huge relevance for policymakers and educators keen on embracing sustainable finance in their curriculum.

finance textbooks: *Organic Finance* Atul K. Shah, 2025-06-11 Modern finance science is profoundly broken and damaging, morally and culturally. It has no choice but to change its theory and pedagogy – but the question is how and in what ways? We urgently need to see the world from a very different, kinder, gentler and more caring paradigm. In truth, the planet is bio-diverse, and so is society, with a huge tapestry of faiths, customs, beliefs and practices in finance. A holistic approach is urgently needed. This book builds a new un-anthropocentric moral and sustainable finance from the ground up, helping students, professionals and scientists to reconstruct the knowledge and connect it to indigenous beliefs and timeless wisdom. An interdisciplinary, nontechnical approach is adopted. Respect for all living beings, the protection of forests, soil and soul, and the importance of trust, culture and relationships are critical to building harmonious communities. Examples and techniques to re-engineer finance science are offered throughout the book.

finance textbooks: *Codes of Finance* Vincent Antonin Lépinay, 2011-08-08 A behind-the-scenes account of the derivatives business at a major investment bank The financial industry's invention of complex products such as credit default swaps and other derivatives has been widely blamed for triggering the global financial crisis of 2008. In *Codes of Finance*, Vincent Antonin Lépinay, a former employee of one of the world's leading investment banks, takes readers behind the scenes of the equity derivatives business at the bank before the crisis, providing a detailed firsthand account of the creation, marketing, selling, accounting, and management of these financial instruments—and of how they ultimately created havoc inside and outside the bank.

finance textbooks: *Project Finance for Construction and Infrastructure* Frederik Pretorius, Berry-Fong Chung-Hsu, Arthur McInnes, Paul Lejot, Douglas Arner, 2008-04-30 This is a self-contained text on the logic and institutions of project finance, supplemented by a series of

project finance case studies illustrating applications in different economic environments, across different jurisdictions and at different stages of development. It will introduce an analytical framework drawing on applied institutional economics that includes and concentrates primarily on an analysis of the institutional logic behind generic project finance arrangements. The application of the institutional framework will be demonstrated with project cases from Hong Kong, Thailand, India, Europe and Azerbaijan – each at different stages of development. While each project case will have a general theme and will highlight aspects of interest to built environment professionals, it will primarily be used to illustrate one or more specific PF/PFI principle.

finance textbooks: Advanced Introduction to Entrepreneurial Finance Hans Landström, 2023-02-14 Fully revised and updated, this Advanced Introduction provides a comprehensive understanding of entrepreneurial finance of new and growing ventures. With a unique research-based focus, Hans Landström synthesizes contemporary knowledge and presents diverse theoretical approaches to explain financial decision-making in entrepreneurial ventures.

finance textbooks: Reinventing Accounting and Finance Education Atul Shah, 2017-10-03 There is a growing acknowledgement of the role played by finance theory and experts in the 2008 global banking crash, and their ongoing contributions to risks in the financial system. Some argue that finance theory is deeply ideological and the academy has been captured and corrupted by financial institutions and conservative journal editors and their unrealistic influence. Its language and terminology have been self-referential, enabling disciplinary closure but generating widening gaps with reality and lived experience. In particular, in spite of its deeply cultural and ethical nature, finance education has been stripped of any wider discussion of ethics and culture, and replaced by a particular neo-liberal greed and materialistic ethic. In an era of financialisation, some have called finance a 'curse on modernity'. The devastation this has caused and continues to cause is making the world highly unequal, risky and unsustainable. Serious and radical reforms are required in the teaching and research of finance. This book charts out the possible solutions for such reform.
