lumen textbooks: Archispeak Tom Porter, 2004-08-02 Widely used in architectural circles in the heat of discussion, the recurrent use of particular words and terms has evolved into a language of design jargon. Commonly found in architectural literature and journalism, in critical design debate and especially in student project reviews, Archispeak can seem insular and perplexing to others and -- particularly to the new architectural student -- often incomprehensible. There is a need to translate architectural design concepts into spoken and written commentary -- each word in use embodying a precise and universally accepted architectural meaning. If we explore the vocabulary of this language we gain insight into good design practice and into collective understanding of what constitutes a refined architecture. This unique illustrated guide will help students understand the nuances of this specialized language and help them in communicating their own design ideas.

lumen textbooks: Cosmopolitan Desire Stephen William Foster, 2006 Foster's timely work looks at globalization processes and the transformations that occur within a diverse society. He investigates the multicultural blend of Western and Moslem cultures in Morocco, showing how a multicultural society deals with differences, e.g., how urban secularized Moslems constitute their identities, and how they present themselves to non-Moslem Westerners. Foster's work is about close encounters-he captures the dialogues between individuals and their resistance to intolerance. He offers a combination of narrative & life history, timely investigation of the intercultural problems facing Westerners & Moslims, and a consideration of the broader psychological and political forces at work in a multicultural society. His ethnography is a rich resource for anthropologists and African studies researchers.

lumen textbooks: The Cinematic Novel and Postmodern Pop Fiction Décio Torres Cruz, 2019-12-05 Décio Torres Cruz approaches connections between literature and cinema partly through issues of gender and identity, and partly through issues of reality and representation. In doing so, he looks at the various ways in which people have thought of the so-called cinematic novel, tracing the development of that genre concept not only in the French ciné-roman and film scenarios but also in novels from the United States, England, France, and Latin America. The main tendency he identifies is the blending of the cinematic novel with pop literature, through allusions to Pop Art and other postmodern cultural trends. His prime exhibits are a number of novels by the Argentinian writer Manuel Puig: *Betrayed* by Rita Hayworth; *Heartbreak Tango*; *The Buenos Aires Affair*; *Kiss of the Spider Woman*; and *Pubis angelical*. Bringing in suggestive sociocultural and psychoanalytical considerations, Cruz shows how, in Puig's hands, the cinematic novel resulted in a pop collage of different texts, films, discourses, and narrative devices which fused reality and imagination into dream and desire.

lumen textbooks: Precedented Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture, and in a holistic manner. It moves gradually from psychophysiology and thinking-doing-feeling modalities, through environmental criteria to environmental modulation, concluding with a debate around mitigation and adaptation. Much use is made of re-interpreting past quotations seen as relevant for environmental architecture. No definitive conclusions are reached, but rather broad discursive messages are offered. The text will have lasting luminance for new generations involved with the built environment.

lumen textbooks: The Cambridge Companion to American Poets Mark Richardson, 2015-10-14 The Cambridge Companion to American Poets brings together thirty-one essays on some fifty-four American poets, spanning nearly 400 years, from Anne Bradstreet to contemporary performance poetry. This book also examines such movements in American poetry as modernism, the Harlem (or New Negro) Renaissance, 'confessional' poetry, the Black Mountain School, the New York School, the Beats, and L=A=N=G=U=A=G=E poetry. Its reputable host of contributors approach American poetry from perspectives as diverse as the poetry itself. The result is a Companion concise enough to be read with pleasure yet expansive enough to do justice to the many traditions American poets have modified, inaugurated, and made their own.

lumen textbooks: Kathy Acker Georgina Colby, 2016-08-30 An in-depth analysis of the work of one of the twentieth century's most innovative writers Kathy Acker's body of work is one of the most significant collections of experimental writing in English. In *Kathy Acker: Writing the Impossible*, Georgina Colby explores Acker's compositional processes and intricate experimental practices, from early poetic exercises written in the 1970s to her final writings in 1997. Through original archival research, Colby traces the stages in Acker's writing and draws on her knowledge of unpublished manuscripts, notebooks, essays, illustrations, and correspondence to produce new ways of reading Acker's works. Rather than treating Acker as a postmodern writer this book argues that Acker continued a radical modernist engagement with the crisis of language, and carried out a series of experiments in composition and writing that are comparable in scope and rigor to her modernist predecessors Stein and Joyce. Each chapter focuses on a particular compositional method and insists on the importance of avant-garde experiment to the process of making new non-conventional modes of meaning. Combining close attention to the form of Acker's experimental writings with a consideration of the literary cultures from which she emerged, Colby positions Acker as a key figure in the American avant-garde, and a pioneer of contemporary experimental women's writing. Key Features Examines unpublished manuscripts, notebooks, lecture notes, letters and manuscripts from the Kathy Acker Papers Features eleven previously unpublished images of original manuscripts, correspondence, and colour illustrations from the Kathy Acker Papers Utilises major archival study of Acker's experimental compositional practices Situates Acker as a late modernist writer and a key figure in the American Avant-Garde

lumen textbooks: Human Migration to Space Elizabeth Song Lockard, 2014-05-13 Human

migration to space will be the most profound catalyst for evolution in the history of humankind, yet this has had little impact on determining our strategies for this next phase of exploration. Habitation in space will require extensive technological interfaces between humans and their alien surroundings and how they are deployed will critically inform the processes of adaptation. As humans begin to spend longer durations in space—eventually establishing permanent outposts on other planets—the scope of technological design considerations must expand beyond the meager requirements for survival to include issues not only of comfort and well-being, but also of engagement and negotiation with the new planetary environment that will be crucial to our longevity beyond Earth. Approaching this question from an interdisciplinary approach, this dissertation explores how the impact of interior space architecture can meet both the physical and psychological needs of future space colonists and set the stage for humankind to thrive and grow while setting down new roots beyond Earth.

lumen textbooks: Eminent Maricones Jaime Manrique, 1999 Jaime Manrique weaves into his own memoir the lives of three important twentieth-century Hispanic writers: the Argentine Manuel Puig, author of *Kiss of the Spider Woman*; the Cuban Reinaldo Arenas, author of *Before Night Falls*; and Spanish poet and playwright Federico García Lorca. Manrique celebrates the lives of these heroic writers who were made outcasts for both their homosexuality and their politics. Manrique's double vision yields insights into Puig, Arenas, and Lorca unavailable to a writer less attuned to the complex interplay of culture and sexuality, as well as that of race and class in Latino and Anglo societies.—George DeStefano, *The Nation* A splendid memoir of Manuel Puig. It evokes him—how he really was—better than anything I've read.—Susan Sontag Where Manrique's tale differs from others is in its unabashed and sensitive treatment of sexuality. One reads his autobiographical account with pleasure and fascination.—Jose Quiroga, *George Washington University* Manrique's voice is wise, brave, and wholly original. This chronicle of self-discovery and literary encounters is heartening and deep.—Kennedy Fraser In this charmingly indiscreet memoir, Jaime Manrique writes with his customary humor and warm sympathy, engaging our delighted interest on every page. He has the rare gift of invoking and inviting intimacy, in this case a triangulated intimacy between himself, his readers, and his memories. These are rich double portraits.—Phillip Lopate

lumen textbooks: Museum Making Suzanne Macleod, Laura Hourston Hanks, Jonathan Hale, 2012-03-15 Over recent decades, many museums, galleries and historic sites around the world have enjoyed an unprecedented level of large-scale investment in their capital infrastructure, in building refurbishments and new gallery displays. This period has also seen the creation of countless new purpose-built museums and galleries, suggesting a fundamental re-evaluation of the processes of designing and shaping of museums. *Museum Making: Narratives, Architectures, Exhibitions* examines this re-making by exploring the inherently spatial character of narrative in the museum and its potential to connect on the deepest levels with human perception and imagination. Through this uniting theme, the chapters explore the power of narratives as structured experiences unfolding in space and time as well as the use of theatre, film and other technologies of storytelling by contemporary museum makers to generate meaningful and, it is argued here, highly effective and affective museum spaces. Contributions by an internationally diverse group of museum and heritage professionals, exhibition designers, architects and artists with academics from a range of disciplines

including museum studies, theatre studies, architecture, design and history cut across traditional boundaries including the historical and the contemporary and together explore the various roles and functions of narrative as a mechanism for the creation of engaging and meaningful interpretive environments.

The authors' purpose in this book is to dissect developments in improvisation in the arts since 1945, with a particular emphasis on process and technique. The approach is analytical and theoretical but is also relevant to practitioners and their audience. Their key argument is that improvisation has been of great importance and value in the contemporary arts, particularly because of its potential to develop new forms (often by breaking definitions).
