Despite its uniqueness and diversity, little is known to the outside world. The book studies the vibrant and diverse socio-political and cultural history of this region through a transdisciplinary perspective, covering a wide range of topics such as the pre-history, medieval and colonial histories of Assam, the geopolitics of the creation of independent states from undivided Assam, oral narratives from Manipur, prehistoric cultures of Meghalaya, the Naga National Movement, Sikkim's Namgyal dynasty, and Tripura's transition from monarchy to democracy. It also discusses the invaluable contributions made by Professor Mohammad Taher (1931–2015), who laid the foundation of geography in Northeast India. A compelling exploration of this geo-politically contested space, this volume will be of interest to students and researchers of anthropology, archaeology, history, human geography, South Asian studies, and minority studies.

pre university textbooks: Myths and Mythical Spaces Claudia Lichnofsky, Enriketa Pandejmoni, Darko Stojanov, 2017-12-04 This volume addresses textbooks written in the Albanian language and in use in Albania, Kosovo, Macedonia and Serbia. Political myths and mythical spaces play a key role in shaping processes of identity-building, concepts of 'self' and 'other', and ideas pertaining to the location of the self and nation within a post-conflict context. The Albanian case is particularly interesting because the majority of Albanians live outside the borders of Albania, despite the existence of the nation-state, which gives rise to fascinating complexities regarding the shaping of national identities and myths surrounding concepts of 'self' and 'other'. What textbooks teach is always of political interest, as they represent society's intentions for its next generation. This renders identity-building processes via textbooks in this context a particularly fascinating topic for research, here examined through the lens of myths and mythical spaces.

pre university textbooks: *Higher Order Thinking Skills in the Language Classroom: A Concise Guide* Afsaneh Ghanizadeh, Ali H. Al-Hoorie, Safoura Jahedizadeh, 2020-09-11 In this book, we try to provide a practical, down-to-earth guide for those who are involved in language learning and teaching. We hope that this book will be a useful reading for those who would like to incorporate higher-order thinking skills (HOTS)-enhancing techniques in their teaching practice. We set out from the position that, although it is hardly doubtful that it is at the heart of education, critical thinking is in reality often not given its due attention in pedagogy, particularly in language education. This book offers readers some practical advice on how to implement HOTS in their own practice. It has been written to take the reader through each technique with the ultimate goal of promoting HOTS step-by-step. In the introductory chapter, we present an overview of the theory behind HOTS, its definition, its relation to Bloom's Taxonomy, its two dimensions (critical thinking and reflective thinking), and the ideas of some influential thinkers in this area. The subsequent chapters present six HOTS-enhancing techniques that classroom teachers can draw from, namely graphic organizers, critical discourse analysis, argumentation, emotion regulation and emotional intelligence enhancing techniques, reflective journals, and mindfulness-based strategies. As the book draws on a wide-ranging review of literature with exercises for direct use with language learners, we hope that this provides both theoretical and practical support for the teaching process to help language learners become effective critical thinkers. The compilation of the ideas in this book took us a long time, over a decade. Something that takes such a long time requires much engagement and life experience; so did this book.
