police textbooks: *The Police and Society* Victor E. Kappeler, Brian P. Schaefer, 2018-09-11 The most productive route to understanding the dynamic interrelationships of the police with society is to examine the recurring, central themes in policing. The articles in this anthology represent some of the best scholarship on compelling issues. Selected for both their complementary and competing natures, the articles serve as touchstones for one another—often challenging previous conceptions. Many selections question the methods by which information was acquired, the practices that evolved from that information, and the background assumptions behind the construction of practices. Some of the many issues and conflicts addressed in this collection include: What is the nature of the police role and function? Who benefits from police service? Who is harmed? How are public safety and social order secured while maintaining individual rights and freedoms? To what extent do our expectations about the police and society reflect our values and demands? Are the police a society unto themselves? Is policing at a critical crossroads? The editors assembled this volume with the goal of helping readers to identify underlying assumptions, to dissect how values influence inquiries, and to discover connections. A better understanding of the role of the police in society provides a solid foundation for assessing the efficacy of future police/society relationships.

police textbooks: *Race and Police* Ben Brucato, 2023-09-15 In the United States, race and police were founded along with a capitalist economy dependent on the enslavement of workers of African descent. *Race and Police* builds a critical theory of American policing by analyzing a heterodox history of policing, drawn from the historiography of slavery and slave patrols. Beginning by tracing the historical origins of the police mandate in British colonial America, the book shows that the peculiar institution of racialized chattel slavery originated along with a novel, binary conception of race. On one side, for the first time Europeans from various nationalities were united in a single racial category. Inclusion in this category was necessary for citizenship. On the other, Blacks were branded as slaves, cast as social enemies, and assumed to be threats to the social order. The state determined not only that it would administer slavery, but that it would regulate slaves, authorizing the use of violence by agents of the state and white citizens to secure the social order. In doing so, slavery, citizenship, and police mutually informed one another, and together they produced racial capitalism, a working class defined and separated by the color line, and a racial social order. *Race and Police* corrects the Eurocentrism in the orthodox history of American police and in predominating critical theories of police. That orthodoxy rests on an origin story that begins with Sir Robert Peel and the London Metropolitan Police Service. Predating the Met by more than a century,

America's first police, often called slave patrols, did more than maintain order—it fabricated a racial order. Prior to their creation, all white citizens were conscripted to police all Blacks. Their participation in the coercive control of Blacks gave definition to their whiteness. Targeted as threats to the security of the economy and white society, being policed defined Blacks who, for the first time, were treated as a single racial group. The boundaries of whiteness were first established on the basis of who was required to regulate slaves, given a specific mandate to prevent Black insurrection, a mandate that remains core to the police role to this day.

police textbooks: Police United States. National Advisory Commission on Criminal Justice Standards and Goals, 1973 This report provides suggestions for overall improvement in delivery of police services for greater protection against crime. The National Advisory Commission on Criminal Justice Standards and Goals considers the patrolman the primary force in reducing and preventing crime and thus directs its report recommendations toward increasing police effectiveness. Suggestions for improvements in police functions are presented in the areas of community, planning and organization, technology and support services, fiscal management, and coordination with other criminal justice agencies. These proposals appear in the form of more than 120 specific standards and recommendations that spell out where, why, and how these improvements can and should be made in the police segment of the criminal justice system. Report on police is a reference work for the practitioner -- patrolman to police chief -- as well as for the interested layman. Before implementing any of the changes advocated, police departments are advised to detail the legal limits of police authority and develop guidelines for the exercise of that authority. In order to improve

cooperation between the police and the community it is suggested that police agencies establish a specialized unit for maintaining communication with citizens. Each police department should encourage and participate in neighborhood security programs and establish procedures to facilitate processing of complaints. Suggestions for more effective utilization of manpower include continued consolidation, stricter personnel requirements, increased employee benefits, and the employment of more women, minorities, and civilians in police work.
