ncc textbooks: *New Materialist Explorations into Language Education* Johanna Ennser-Kananen, Taina Saarinen, 2022-10-10 This open access book analyzes language education through a socio-material framework. The authors revisit their position as researchers by decentering themselves and humans in general from the main focus of research activities and giving way to the materialities that are agential but often overlooked parts of our research contexts and processes. Through this critical posthumanist realism, they are able to engage in research that sees society as an ethical interrelationship between humans and the material world and explore the socio-materialities of language education from the perspectives of material agency, spatial and embodied materiality, and human and non-human assemblages. Each chapter explores language educational contexts through a unique lens of (socio)materiality. Based on how the authors conceptualize (socio)materiality, the book is organized in three sections that seek answers to the following overarching questions: In what ways do material agencies emerge in language educational contexts? How are educational choices and experiences intertwined with materialities of spaces and bodies? What assemblages of human and non-human may occur in language education contexts? Each chapter questions, in its own way, the notion of the human subject as rational, enlightened being and sole possessor of agency, and offers examples of allowing for other-than-human agency to enter the picture. Together, the contributors exemplify how researchers who have been committed to social constructionist thinking for most of their careers learn to make space for new theories, thus inspiring and encouraging readers to remain open for new intellectual and embodied endeavors.

ncc textbooks: History of Education Policymaking in India, 1947-2016 R. V. Vaidyanatha Ayyar, 2017-09-12 This book comprehensively chronicles the history of the education policymaking in India from 1947 to 2016 with a focus on the developments after 1964 when the Kothari Commission was constituted. The book is informed by the rare insights acquired by the author while making policy at the state, national, and international levels of governance. Another distinguishing feature of this book lies in the attention it pays to the process and politics of policymaking and the larger setting—or, to use jargon, the political and policy environment—in which policies were made at different points of time. The author brings out a crucial analysis of the Indian educational system against the backdrop of national and global political, economic, and educational developments. Two other distinguishing features of the book are the systematic treatment of the regulation of education and the role of judiciary in the making and implementation of education policies.

ncc textbooks: Educational Response, Inclusion and Empowerment for SDGs in Emerging Economies Mustafa Öztürk, 2022-08-22 This volume analyzes cases from emerging economies in relation to the global endeavor to promote the vision of sustainable development in all forms of education. It aims to discuss the significance of hearing local voices and understanding local discourse regarding strategies for action for change, and the role of educational systems as a means to communicate, promote and educate for the Sustainable Development Goals (SDGs). In this book, emerging economies are defined as newly industrialized countries that have not yet reached developed status, but have, in a macro-economic sense, outpaced their developing counterparts. In this context, the book highlights how education in emerging economies could extend conventional

economic methods to sustainability issues, or depart from money-based calculations and business-dominated values to promotion of real-life considerations and ethical, environmental and humanistic values. With the help of this volume, readers will have a chance to look at educational response, inclusion and empowerment for SDGs in countries with emerging economies, and to grasp the synthesis of Education for Sustainable Development/Global Citizenship Education (ESD/GCE) within the overall national educational systems. This volume focuses on early childhood through upper secondary education.
