ncert textbooks 7 class: Endless Siege Krzysztof Iwanek, 2022-05-13 This is an ethnographic study of the Vidya Bharati chain of schools in India which are run by a Hindu nationalist organization

called the Rashtriya Swayamsevak Sangh (RSS). The first study of its kind, this volume is an important narrative on the role and impact of textbooks in modern India. Despite having limited resources (they are run on a tight budget) and being based on a radical ideology that derives from a 'Hindu' nationalist agenda, the Vidya Bharati schools have achieved considerable success in the free market of private education and have grown to over 12,000 schools within 40 years. They are an important example of the interlinkage between ideology and nationalism in contemporary India. The author analyses school structure, curriculum, teaching quality, institutional goals, and ideology in an effort to identify reasons behind Vidya Bharati's success and to show through his field research that a combined strategy of pragmatism blended with ideology has allowed the schools to become highly sought-after. This analysis then asks broader questions about the failures of the public education system in India.

Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-making on the sustainable use of natural resources.
