online textbooks pearson: Resurgent Julian Birkinshaw, John Fallon, 2025-07-17 A practical handbook examining how established businesses can use their unique advantages to fight back and win in a digital arena too often dominated by tech start-ups, disruptors and unicorns. The big tech companies (Alphabet, Amazon, Apple, Meta, Microsoft) have had an enormous impact on our everyday lives. A new wave of start-ups in the tech sector has dominated the press and swallowed up huge amounts of investment. But what about those established companies in the traditional parts of the world's economies, from energy, industrial and consumer goods to travel and health? They rarely got a mention. Everyone was talking about the disrupters – the start-ups and the entrepreneurs – and not about the incumbents. This book is a call for a reality check. For at the core of our established companies are capabilities and qualities that remain highly relevant in the digital age.

They are often market leaders for very good reasons – they know their customers and markets well, and they have great product, sales and marketing expertise. They are operationally savvy and financially strong, with deep insights into areas of expertise that no one else has, giving them a unique advantage. John Fallon and Julian Birkinshaw have come to a clear conclusion: incumbents are not going quietly into that dark night. Organizations will need to jettison their analogue baggage and infrastructure and embrace digital transformation. They will survive and they will prosper. And this shows how they are doing it.

online textbooks pearson: *Consumerism and Prestige* Anthony Enns, Bernhard Metz, 2022-07-05 This anthology explores the relationships and interdependencies between literary production and distinctions of taste by examining how the material aspects of literary texts, such as the cover, binding, typography and paper stock, reflect or even determine their cultural status. In many cases, for example, the distinctions between “highbrow” and “lowbrow” taste have little to do with the content of the texts themselves, as books often function as markers of socioeconomic status, like clothing or home décor. One might even go so far as to say that the concept of literary taste is more closely related to fashion sense than critical judgment. The anthology seeks to address this claim by examining how the tensions between consumerism and prestige reflect fundamental historical changes with regard to the development of technology, literacy and social power.

online textbooks pearson: *Cyberpsychology as Everyday Digital Experience across the Lifespan* Dave Harley, Julie Morgan, Hannah Frith, 2018-05-25 Digital technologies are deeply embedded in everyday life with opportunities for information access and perpetual social contact now mediating most of our activities and relationships. This book expands the lens of Cyberpsychology to consider how digital experiences play out across the various stages of people’s lives. Most psychological research has focused on whether human-technology interactions are a ‘good’ or a ‘bad’ thing for humanity. This book offers a distinctive approach to the emergent area of Cyberpsychology, moving beyond these binary dilemmas and considering how popular technologies have come to frame human experience and relationships. In particular the authors explore the role of significant life stages in defining the evolving purpose of digital technologies. They discuss how people’s symbiotic relationship with digital technologies has started to redefine our childhoods, how we experience ourselves, how we make friends, our experience of being alone, how we have sex and form romantic relationships, our capacity for being antisocial as well as the experience of growing older and dying. This interdisciplinary book will be of great interest to scholars and practitioners across psychology, digital technology and media studies as well as anyone interested in how technology influences our behaviour.

online textbooks pearson: Global Experience Industries Jens Christensen, 2009-08-30 The experience economy is a fourth economic field different from commodities, goods and services. Experiences are an economic value added to a product or identical with the product. When you buy an experience, you pay to spend time enjoying a series of memorable events that a company stages to engage the customer in a personal way. The experience dimension has moved into a predominant place since the 1990s, fueled by an expanding global and digital economy. In developed countries, people get richer and more individualized and having met all basic materiel needs, they focus increasingly on personal development and self realization. Demand for experience-based products increases, such as tourism and sports as well as film, music and other contents of media and interactive technologies. Furthermore, the demand for experience values is extended to include any product and dimension of modern societies, such as the design of houses, furniture, clothes, cars, computers, etc. This is not a completely new story. Commercial entertainment and design has been around for a century or so. And in addition, universal values of love, sex, belief, family and the meaning of life have always been vital to human beings. What is new is the fact that capitalism is invading more and more fields of experiences connected with emotions and the extension of life proportions. In all developed countries and increasingly on a global scale, a series of expanding industries have emerged to supply the market with experience-oriented goods. In this book, the business development of markets and industries is covered from tourism, to media and entertainment, and from design to sex, including leading companies and trends in all industries involved.
