online textbooks gcse: *Textbooks on Israel-Palestine* Seyed Hadi Borhani, 2022-01-27 How is the Israel/Palestine question narrated in Western academia? What ideas dominate the key textbooks on the subject and what is presented as 'truth'? This book answers these critical questions. It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine. But academic support of Israel in the West has been a neglected issue, with Western academic knowledge being regarded as impartial and objective. This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel/Palestine question. Rather, knowledge has been biased, misleading, and dogmatic and Western college students are subscribing to 'factual histories' based on theories at best, if not fiction. The book is the first empirical investigation able to document this partial reporting of history. Seyed Hadi Borhani examines the most popular college-level textbooks used to teach the history of the Israel/Palestine in Western universities, combining 'textbook analysis' (to determine how the dominant academic texts report the question) and a 'context analysis' (to identify who 'manufactures' the dominant knowledge). The book provides a historical map of how the Israel-Palestine conflict is understood in the West. The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much-needed intervention into the state of affairs in Western academia.

online textbooks gcse: *Menstrual Myth Busting* Sally King, 2025-02-27 In this book, Sally King interrogates the diagnostic label of premenstrual syndrome (PMS) to expose and challenge sexist assumptions within medical research and practice. She powerfully demonstrates how the concept of the 'hormonal' premenstrual woman is merely the latest iteration of the 'hysterical' female myth. By blaming the healthy reproductive body (first our wombs, now our hormones) for the female-prevalence of emotional distress and physical pain, gender myths appear to have trumped all empirical evidence to the contrary. The book also provides a primer on menstrual physiology beyond

hormones, and a short history of how hormonal metaphors came to dominate medical and popular discourses. The author calls for clinicians, researchers, educators and activists to help improve women's health without unintentionally reproducing damaging stereotypes.
