investment banking textbooks: *Discussion Materials* Bill Keenan, 2020-03-31 "Why aren't you using LTM EBITDA for credit metrics?" asked the managing director who sat across from me, his widow's peak clearly visible as he inspected the sheet in front of him. His spacious office looked out onto New York Harbor. "Bust," said the vice president, who was a slightly younger, douchier

version of Widow's Peak. He slashed his red ballpoint pen across the sheet and flipped to the next page. "Walk me through the debt paydown and your interest rate assumptions," continued the VP. "Pretty dovish view. Maybe the Fed knows what they're doing after all," said Widow's Peak. He shot a glance at the VP. They shared a chuckle—at what, I couldn't tell you. This question about interest rates I knew: Dovish, I thought. Doves fly south for the winter, so dovish is downwards...low interest rates— "We're running short on time," said Widow's Peak. He flipped to the cover page of my presentation. "One final point—all pitch decks should have the same title." "Since this presentation was geared towards an LBO analysis I was thinking—" "No thinking. All decks—same title—Discussion Materials." Noted. Discussion Materials gives the reader an honest look at Wall Street from someone in the trenches. After graduating from Columbia Business School, Bill Keenan joined Deutsche Bank's investment banking division as an associate where despotic superiors (and the blinking red light of his BlackBerry) instilled low-level terror on an hourly basis. You'll join him in his cubicle on the 44th floor of 60 Wall Street as he scrambles to ensure floating bar charts are the correct shade of orange and all numbers are left-aligned, but whatever you do, don't ask him what any of it means. Leaning heavily on his fellow junior bankers and the countless outsourcing resources the bank employs, he slowly develops proficiency at the job, eventually gaining traction and respect, one deal at a time, over a two-year span, ultimately cementing his legacy in the group by attaining the unattainable: placing a dinner order on Seamless one Sunday night at work from Hwa Yuan Szechuan amounting to \$25.00 (tax and tip included), the bank's maximum allowance for meals—the perfect order.

Man learnt to invest a long time ago, but investment banking has a relatively short history. It wasn't until the Dutch East India Company, VOC, started issuing bonds and shares of stock to the general public that investment banking saw the light of the day. But since then, the services provided by investment banks has grown exponentially and it is today considered to be one of the most lucrative segments of financial institutions. Investment banking is different from commercial or retail banks in the fact that they do not take deposits. But this is not the only difference, there are other things that make investment banking unlike any other form of banking. There are a number of functions performed by investment banks. Investment bankers in the U.S. must be a licensed broker-dealer and they must follow the rules and regulations laid down by the Securities and Exchange Commission (SEC) and Financial Industry Regulatory Authority (FINRA). Knowing the history of investment banking, the manner in which it has evolved over the period of time and the different services that it offers can help anyone who wants to be an investment banker or who is interested in investment banking.

investment banking textbooks: Investment Banking Giuliano Iannotta, 2010-01-12 From a historical point of view, the main activity of investment banks is what today we call security underwriting. Investment banks buy securities, such as bonds and stocks, from an issuer and then sell them to the ?nal investors. In the eighteenth century, the main securities were bonds issued by governments. The way these bonds were priced and placed is extraordinarily similar to the system that investment banks still use nowadays. When a government wanted to issue new bonds, it negotiated with a few prominent “middlemen” (today we would call them investment bankers). The middlemen agreed to take a fraction of the bonds: they accepted to do so only after having canvassed a list of people they could rely upon. The people on the list were the ?nal investors. The middlemen negotiated with the government even after the issuance. Indeed, in those days governments often changed unilaterally the bond conditions and being on the list of an important middleman could make the difference. On the other hand, middlemen with larger lists were considered to be in a better bargaining position. This game was repeated over time, and hence, reputation mattered. For the middlemen, being trusted by both the investors on the list and by the issuing governments was crucial.
