**ncert textbooks for class 11: Endless Siege** Krzysztof Iwanek, 2022-05-13 This is an ethnographic study of the Vidya Bharati chain of schools in India which are run by a Hindu nationalist organization called the Rashtriya Swayamsevak Sangh (RSS). The first study of its kind, this volume is an important narrative on the role and impact of textbooks in modern India. Despite having limited resources (they are run on a tight budget) and being based on a radical ideology that derives from a 'Hindu' nationalist agenda, the Vidya Bharati schools have achieved considerable success in the free market of private education and have grown to over 12,000 schools within 40 years. They are an important example of the interlinkage between ideology and nationalism in contemporary India. The author analyses school structure, curriculum, teaching quality, institutional goals, and ideology in an effort to identify reasons behind Vidya Bharati's success and to show through his field research that a combined strategy of pragmatism blended with ideology has allowed the schools to become highly sought-after. This analysis then asks broader questions about the failures of the public education system in India.

**ncert textbooks for class 11: Political Culture, Soft Interventions and Nation Building** Tiffany Jenkins, 2016-01-13 This book raises questions about cultural interventions, an area of investigation somewhat overlooked in place of developing a critique of political interventions. Whilst political interventions are more explicit, coercive, and have a wide-reaching impact, it is important also to examine the way culture is used in attempts to reconstruct society and peoples - the 'soft' side of statebuilding, where heritage is utilised to play a role in the construction of the nation and the people, in memory and identity. For it can play a role in legitimizing myths and identifying symbolic, historic events, and implicitly informs the construction of infrastructure, institutions, and other aspects of civic life. Contributors from the fields of politics, anthropology, archaeology, and sociology examine interventions in state and nation building through cultural methods, the 'soft' side of statebuilding, including the preservation and promotion of certain heritage, the politics of remembrance and monument building, and the repatriation of human remains and artefacts to communities in the name of making reparations for past atrocities. These are timely contributions. Heritage and cultural is too often considered in terms of how tourism might contribute to the economy post-conflict, neglecting the construction of meaning and memory through decisions about what is preserved or not. It will be of special interest to those in the field of cultural studies, archaeology, and politics as well as international relations. This book was published as a special

issue of the Journal of Intervention and Statebuilding.

**ncert textbooks for class 11: Religious Fundamentalism in the Contemporary World** Santosh C. Saha, 2004-01-01 Today new and ever more pernicious forms of terrorist violence threaten the world. Because these new forms of violence are so often linked to religious radicalism, modern terrorism has challenged the secular ethics of contemporary civil society. There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice. Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric, the importance of its regional variants, and the damage it can do to regional and national education systems. Their analysis tracks trends in religious movements that aspire to radicalize, reform, and violently topple governments and nations, while highlighting the difference between fundamentalist interpretations and other longstanding juridical, political, and intellectual traditions.
