textbooks com legit: *Textbooks in American Society* Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years, textbooks have been widely criticized for low standards, lack of imaginativeness, and insensitivity to racial and gender issues. Increasingly, they are cited as another weak link in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks—from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the

intersection of religion and culture in school textbooks.

textbooks com legit: Science Competes Barry Bozeman, 2025-04-01 When science competes with myriad influences in public policymaking, how can we ensure that it does so effectively? Policymakers, like most people today, have a world of information within easy reach, much of it wrong. How, amid the chaos and misdirection of our day's information ecosystem, can science compete for the attention and trust of those who make public policy—especially at a time when issues like proliferating infectious diseases and climate change put a premium on accurate and relevant scientific information? What's needed, Barry Bozeman suggests in *Science Competes*, is a clearer understanding of how scientific information is conveyed, how it is understood and used, and where it fits in the wide array of information that might be of use to those who make and administer policy, laws, and regulations, as well as citizens who actively participate in public life.

Acknowledging the importance of different sorts of information—historical, experiential, political—to decision-making, Bozeman focuses on enhancing, not maximizing, the effective use of science in public policy. This entails recognizing that valid and useful scientific information is not necessarily formal scientific knowledge, but often takes the form of science by-products such as raw or structured data, graphics, and conceptual models. Explaining how such information can be better distinguished from half-truths and pernicious falsehoods, *Science Competes* also raises the possibility that effective competition might require improvements in science institutions, norms, and ideas about acceptable behavior.

textbooks com legit: Palestinian Identity in Jordan and Israel Riad M. Nasser, 2013-04-15 The book examines the process of national identity formation. It argues that identity, whether of a small community, a nation, an ethnic group, or a religious community, requires an Other against whom it becomes meaningful. In other words, identity develops via difference from Others against whom our sense of self becomes meaningful. This thesis emerges out of the synthesis the study develops from the various modern and poststructuralist theories of identity and nationalism.

textbooks com legit: National Identities in Pakistan Cara Cilano, 2014-06-03 In 1971, a war which took place in Pakistan that resulted in the establishment of two separate countries; East Pakistan became Bangladesh, leaving the remaining four western provinces to comprise a truncated Pakistan. This book examines how literature by those who remained Pakistanis acts as a cultural response to the threat the war posed to a nationalist identity. It provides an analysis of the writing by Pakistani authors in their attempt to deal with the radical shock of the war and shows how fiction about the war helps readers imagine what the paring down of the country means for any abiding articulation of a Pakistani group identification. The author discusses English-and Urdu-language fictions in the context of the historical debate about Pakistani nationalism, including how such nationalism informs literary culture, and in the contemporary interest in official apologies for the past. The author organises the literary analysis around four key issues: the domestic sphere and the family; the territorial limits of citizenship; multiculturalism, class, and nationalist history; and diasporic imaginings of the nation. These issues resonate across the fictions in both languages and the author's analysis of them traces how these works grapple with changing notions of what it means to be Pakistani after the civil war and offers an interesting discussion to studies in South Asia.

textbooks com legit: *Women in Formal and Informal Education* , 2023-05-01 Understanding the processes related to gender construction requires a multi and interdisciplinary approach. Complexity emerges as a category of investigation and an end to be pursued, giving space to a plurality of voices, interpretations, and points of view. With such intellectual curiosity, the volume's authors questioned the inclusion and exclusion of these multiple voices in education. How has teaching on gender made room for this complexity? What views were included? Which ones were overlooked? What have educational models for children been privileged in the imagination? Which histories and stories have accompanied them in acquiring an awareness linked to gender? Through such important questions and many more, the volume highlights the gender changes that took place from mid-eighteen century to today in various contexts relating to formal and informal education through an international comparative perspective. The multiplicity of approaches, methodologies, and perspectives allows us to read and analyze these changes in a composite way, underlining little-known aspects of gender studies in the historical-educational field.

textbooks com legit: *Studies in the History of the English Language VIII* Peter Grund, Megan Hartman, 2020-11-09 This volume collects essays that approach notions of creating, maintaining, and crossing boundaries in the history of the English language. The concept of boundaries is variously defined within linguistics depending on the theoretical framework, from formal and theoretical perspectives to specific fields and more empirical, physical, and perceptual angles. The contributions to this volume do not take one particular theoretical or methodological approach but, instead, explore how examining various types of boundaries—linguistic, conceptual, analytical, generic, physical—helps us illuminate and account for historical use, variation, and change in English. In their exploration of various topics in the history of English, contributions ask a range of questions: what does it mean to set up boundaries between time periods? When do language varieties have distinct boundaries and when do they overlap? Where do language users draw up clausal, constructional, semantic, phonetic/phonological boundaries? Thus, the chapters explore not only how boundaries illustrate synchronic and diachronic features in the history of the English language but also what we can discover by questioning perceived or actual boundaries.

Also included are surveys of major controversies and chronicles of resistance. Censorship will be an essential reference work for students of the many subjects touched by censorship and for all those who are interested in the history of and contemporary fate of freedom of expression.

textbooks com legit: **Teaching Peace and Conflict** Catherine Vanner, Spogmai Akseer, Thursica Kovinthan Levi, 2022-06-14 This book illustrates the multiple roles of textbooks as victim, transformer, and accomplice to conflict by introducing the Intersecting Roles of Education in Conflict (IREC) framework for use in the research, development, production, distribution, and dissemination of textbooks and learning materials. The framework illustrates these three potentially overlapping roles by mapping the complex educational contexts of conflict-affected societies and considering how textbooks, learning materials, and education systems more broadly may simultaneously operate within these various roles. Country case studies from Asia, Europe, Africa, and the Middle East are used to analyze primary and secondary school textbook development, content, and application from a variety of approaches that articulate conflict as protracted and/or socio-political violence. The breadth of case studies shows how conflict discourse circulates in educational systems and materials in a wide range of contexts, indicating that the complexity of the relationship between textbooks and conflict is not unique to one culture, geographic region, or type of conflict.

Can Holocaust education, an encounter with the most extreme racial ideology to afflict the continent, reduce violence and prejudice against Jewish and other minority groups? The important studies in this volume address these and other pressing issues for the field, including the progress of Central and Eastern European countries that experienced both Soviet hegemony and Nazi terror in grappling with the history of the Holocaust. Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-making on the sustainable use of natural resources.

There is currently a great deal of discussion in the humanities and social sciences about collective memory, but there is very little agreement on what it is. The first goal of this volume is to review various understandings of this term to bring some coherence to the discussion. Drawing on this review, James V. Wertsch goes on to outline a particular version of collective remembering grounded in the use of 'textual resources', especially narratives. This takes him into the special properties of narrative that shape this process and into the issues of how these textual resources are produced and consumed. Wertsch brings these general ideas to life by examining the rapid, massive transformation of collective memory during the transition from Soviet to post-Soviet Russia.
