teaching textbooks 6th grade: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks 6th grade: *Second Language Acquisition* Thomas Jerome Baker, 2013-05-14 Written for new teachers, experienced teachers, parents of English Language Learners worldwide, and students from all disciplines with a need to know how students learn English in actual day to day practice. This book provides an actionable answer to the question of How Do Students Learn English? through the discovery method applied to case studies and actual experience, in reality. If encountering the topic for the first time, this is a clear and practical introduction to experiential Second Language Acquisition (SLA). It shows actual students and teachers grappling with SLA issues in an interdisciplinary manner. To do this, we stand on the shoulders of giants like Wittgenstein, Gass & Selinker. Storytelling becomes the medium to illustrate SLA in action, without being heavy on explanation. This is an inductive, discovery approach to deep learning about SLA in action. How a second language is acquired; whether English, French, Yu'pik, or Mapudungun is what the second language learner needs to know; whether in the USA, Canada, Singapore, China, Chile or any other location worldwide, we all need to find relevant answers to know why some learners are more successful than others. The book introduces in a warm, friendly, first-person, engaging fashion a range of fundamental concepts - such as SLA in adults and children, in formal and informal learning contexts, and in diverse sociocultural settings - and takes (in the tradition of Gass & Selinker) an interdisciplinary approach, encouraging students to consider SLA from linguistic, psychological, and social perspectives. *Second Language Acquisition: This book is designed to inspire readers to reach for their dreams in language learning.
