textbooks helpline number: *The New Politics of the Textbook* Heather Hickman, Brad J. Porfilio, 2012-10-29 In an era when corporate and political leaders are using their power to control every aspect of the schooling process in North America, there has been surprisingly little research on the impact of textbook content on students. The contributors of this volume and its partner (*The New Politics of the Textbook: Problematizing the Portrayal of Marginalized Groups in Textbooks*) guide educators, school administrators, academics, and other concerned citizens to unpack the political, social, and cultural influences inherent in the textbooks of core content areas such as math, science, English, and social science. They urge readers to reconsider the role textbooks play in the creation of students' political, social, and moral development and in perpetuating asymmetrical social and economic relationships, where social actors are bestowed unearned privileges and entitlements based upon their race, gender, sexuality, class, religion and linguistic background. Finally, they suggest ways to resist the hegemony of those texts through critical analyses, critical questioning, and critical pedagogies.

textbooks helpline number: Copyright and Course Reserves Carla S. Myers, 2022-10-05 With the guidance of this book, academic librarians wishing to provide print, electronic, and streaming media (music and film) course reserve services for their campus communities can do so in compliance with U.S. copyright law. Many academic libraries offer print and electronic course reserve services that encourage learning by connecting students and faculty with less expensive and supplementary educational materials. Unfortunately, there are many misconceptions regarding how U.S. copyright law affects course reserve services; as a result, many academic libraries restrict the scope of the services they provide or refrain from pursuing new options, such as media reserves, out of fear of violating the law or being sued for copyright infringement. *Copyright and Course Reserves* addresses this problem, providing authoritative advice for making print, electronic, and media course reserves available in compliance with U.S. copyright law. It explains options for implementing and sustaining media reserve services through which students and faculty can access online music, sound recordings, and film. Additionally, short examples from a wide range of libraries explore real-world scenarios and current issues related to course reserve services to help readers better understand and apply the information found in the book.

textbooks helpline number: Textbooks in Academic Libraries Chris Diaz, 2018-12-03
Shortly after the syllabi are posted, and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core-course textbook reserve program; funding sources for starting or piloting a program; using aggregated enrollment, grade, and textbook cost data to identify high impact courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings, and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

textbooks helpline number: Education and Inequality in India Manabi Majumdar, Jos Mooij, 2012-10-02 This book focuses on primary education in India and interrogates what schooling means and does to children from weaker sections of Indian society and which values underpin the school system. It examines whether the concept of education for all is just a mechanically conceived policy target to chasing enrolment and attendance or whether it a larger social goal and a deeper political statement about the need for attacking entrenched social inequalities, and above all an affirmation of the idea that schooling has a liberating potential. Drawing on original data collected in the two states of Andhra Pradesh and West Bengal, the authors first present the multiple ways in which social class impinges on the educational system, educational processes and educational outcomes. In the second part of the book, issues around autonomy and accountability are explored via an analysis of the position of teachers within the educational hierarchy, and by looking at the

various possibilities of making teachers accountable. The last part centres on the learning process, with a particular focus on the classroom. The conclusion includes recommendations that are related to the necessity for a larger debate and normative framework, which includes private schools as possible partners in the pursuing of a public good for which a public entity should take some responsibility, and in conjuncture to that, the necessity to move from government action and responsibilities to a broader concept of public action-- Provided by publisher.
