textbooks grade 10: (Re)Constructing Memory: School Textbooks and the Imagination of the Nation James H. Williams, 2014-08-08 This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials—children's readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the Khmer Rouge in post-conflict Cambodia; children's readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion.

textbooks grade 10: *Education and the Politics of Memory in Russia and Eastern Europe* Sergey Rumyantsev, 2025-01-21 This book examines both formal and extracurricular education, and the politics of memory and historical narratives in Armenia, Azerbaijan, Russia, and Ukraine. The misalignment between memory politics and history politics forms a central theme of this book. Structured in three parts, it focuses on school education in the post-Soviet states over the 30 years between the collapse of the Soviet Union and the 2022 Russian invasion of Ukraine. The chapters inquire as to how post-Soviet school education, politics of memory, and history politics became active participants in the production of state-approved ideology, patriotism, and a state-prescribed understanding of the national past. Armed conflicts in the territory of the former USSR not only saw numerous victims and refugees but also the emergence of new borders and unrecognized (de-facto) states, and the annexation of territories. They also contributed to the creation of new sites of memory, generated their own traditions of commemoration for the heroes and victims of these confrontations, and led to the reconstruction of historical narratives and the construction of new national myths. The research in this book foregrounds how the nationalization of the public space and the reconstruction of national historical narratives in the independent states reflect a desire to monopolize the power to interpret the past, with low tolerance of alternative accounts. In this light, the book covers issues such as the nation-state, Sovietization, national history creation, memory politics, religion, mass media, nationalism and patriotism, and analyzes the relationship of Azerbaijani and Armenian, Russian and Ukrainian societies with their histories and pasts. A novel study on the topic of memory and history writing, this is a timely contribution to the field of Post-Soviet history and Russian and Eastern European Studies. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

textbooks grade 10: *Textbooks and War* Eugenia Roldán Vera, Eckhardt Fuchs, 2018-10-04 This volume reflects on the role played by textbooks in the complex relationship between war and education from a historical and multinational perspective, asking how textbook content and production can play a part in these processes. It has long been established that history textbooks play a key role in shaping the next generation's understanding of both past events and the concept of 'friend' and 'foe'. Considering both current and historical textbooks, often through a bi-national comparative approach, the editors and contributors investigate various important aspects of the relationships between textbooks and war, including the role wars play in the creation of national identities (whether the country is on the winning or losing side), the effacement of international wars to highlight a country's exceptionalism, or the obscuring of intra-national conflict through the ways in which a civil war is portrayed. This pioneering book will be of interest and value to students and scholars of textbooks, educational media and the relationships between curricula and war.

textbooks grade 10: After Soviet State Antisemitism Yohanan Petrovsky-Shtern, Vladimir Ze'ev Khanin, 2024-10-21 Following the abolishment of state-sanctioned antisemitism under Gorbachev's Perestroika liberalization policy, Jewish life in the (F)SU ([former] Soviet Union) was dominated by two interrelated trends: large-scale emigration on the one hand, and attempts to re-establish a fully-organized local Jewish life on the other. Although many aspects of these trends have become the subjects of academic research, a few important developments in the recent decade have not been studied in depth. The authors of this volume trace these trends using various methods from the social sciences and humanities and focusing on issues pertaining to the physical, mental, legal, and cultural borders of the Jewish collective in the post-Soviet Eurasia; traditional and modern patterns of Jewish ethnic, national, religious, and cultural identities; the development of Jewish organizations and movements; contemporary Jewish religious and civil culture; and the general sociocultural and political context(s) of the FSU Jewish life. This volume will make a robust contribution to research on contemporary Jewish (and other) ethnicities and will enrich public discourses on ethnic, religious, and cultural minorities and their current situation in Europe and the FSU.

textbooks grade 10: Eastern European Mathematics Education in the Decades of Change Alexander Karp, 2020-05-04 This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe, exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes, little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed, the analyzed processes are complex and vary across the states. Accordingly, this book touches on many factors--including differences in cultures and traditions – that find expression in the teaching of mathematics. Specifically, this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years, and how these changes may be explained and documented; what changes there were in the content of mathematics education and its assessment, and how were they motivated and adopted; what new textbooks appeared and what new methodological ideas were offered in them; how and why mathematics teacher education and/or professional development changed; what was the role (if any) of foreign influences on mathematics education, etc. The book will be of interest to both researchers in mathematics education and practitioners-teachers, as well as a broader audience of historians and educators exploring the political aspects of education.

textbooks grade 10: Adoption and impact of OER in the Global South Cheryl Hodgkinson-Williams, Brazil Arinto, 2017-12-29 Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice

and research in developing countries.

textbooks grade 10: Education during the Time of the Revolution in Egypt Nagwa Megahed, 2017-11-13 Since the 25th January 2011 revolution, Egyptians experienced and engaged in a daily debate. Controversially, some argued that the conflict and revolts in Egypt, and the Arab region, were neither coincidental, nor the result of a “domino effect” of collective actions by oppressed people against autocratic regimes. Rather, these revolts were the result of mobilization efforts made over decades by several activist groups, as well as national and international non-governmental organizations. Contrary to this view, others claim that despite the rapid economic growth of Egypt in the 2000s, there was a wide gap in the distribution of wealth and economic return, which left the majority of Egyptians suffering from poverty and high rate of unemployment, especially among youth. Obviously, while national and international economic and political dynamics dominated the daily debate, education remains the forgotten arena amidst conflict. With the exacerbation of conflict between militant extremists and modern states in the region, and most recently in many European countries, it became more important than ever before to understand the dialectics of education in conflict in different local contexts, starting in this book by the Egyptian context. The book focuses on education in Egypt during the time of the revolution as perceived by university students, youth activists, educational professionals, government officials and civil society organizations. Its chapters reveal the tension, contradiction and/or coherence among different players as related to their respective role in education for civic engagement, national identity, global citizenship, peace-building, teacher professional development, and women's and students' empowerment. The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and reality(ies) during the time of the revolution and its aftermath.

textbooks grade 10: Proceedings of the International Conference on Learning and Advanced Education (ICOLAE 2022) Mauly Halwat Hikmat, Yasir Sidiq, Naufal Ishartono, Yunus Sulistyono, Patmisari, Susiati, 2023-08-29 This is an open access book. The COVID-19 pandemic in the last two years has influenced how educational system works. Online learning became the primal policy taken by all institutions in the world to lower the risk of the virus spread. Despite the drawbacks of the online learning, teachers and students were accustomed with the distant learning through web meetings, Learning Management Systems (LMS) and other online learning platforms. In that time, topics under digital learning and education 5.0 were the main stakes in academic disseminations. This year some institutions start to conduct their teaching and learning process classically as before the pandemic, others are still continuing online and not few are in hybrid. This leaves a question: what learning reform should be made in post-pandemic era? This conference invites researchers, experts, teachers and students to discuss the coping solutions of the question. It is important for them to contribute to the understanding of re-imaging online education for better futures, innovative learning design, new skills for living and working in new times, global challenge of education, learning and teaching with blended learning, flipped learning, integrating life skills for students in the curriculum, developing educators for the future distance learning, humanities learning in the digital era, assessment and measurement in education, challenges and transformations in education, technology in teaching and learning, new learning and teaching models. textbooks grade 10: Textbooks in American Society Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years, textbooks have been widely criticized for low

standards, lack of imaginativeness, and insensitivity to racial and gender issues. Increasingly, they are cited as another weak link in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks—from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.
