This edited volume contains research-informed chapters focusing on: analysis of textbook content; how textbooks are used in the classroom; and textbook writers' accounts of the materials writing, design, and publishing process.

teaching textbooks 7: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some

case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks 7: *Critical Pedagogies for Modern Languages Education* Derek Hird, 2023-07-13 In the context of Black Lives Matter, decolonizing initiatives, #MeToo, climate emergency protests and other movements for social and environmental justice, this volume posits a simple question: how can modern languages be taught so that they challenge rather than reinforce social inequalities? Informed by interdisciplinary theories, *Critical Pedagogies for Modern Language Education* focuses on practical discussions of case studies in areas directly relevant to the classroom contexts of modern languages educators. The volume transforms modern language educators and the modern language profession by putting the politics of language teaching at the centre of its analysis. With case studies covering 11 languages (Modern Standard Arabic, Dutch, English, French, German, Levantine, Mandarin, Portuguese, Spanish, Swedish, Tamazight) across 13 countries and regions (Austria, Brazil, China, France, Italy, the Levant, Morocco, the Netherlands, Palestine, Spain, Sweden, the UK, and the USA), the contributors cover a wide range of theories, including critical discourse analysis, activist pedagogies, culturally sustaining pedagogy, linguistic justice and translanguaging. With student-teacher collaboration at its heart, critical modern languages pedagogy unmasks the ideologies and hegemonies that lie behind mainstream language use and affirms the value of minority linguistic and cultural practices. The volume thus provides transformative approaches to modern languages teaching and learning that respond to the key social concerns of the 21st century.

teaching textbooks 7: *A Functional Linguistic Perspective on Developing Language* Anne McCabe, 2021-06-23 This volume offers a comprehensive account of language development from a Systemic Functional Linguistic (SFL) perspective, integrating theory and data from a wide range of research studies. The book begins by taking an in-depth look at SFL theory and its focus on texts,

highlighting the metafunctional nature of language and the ways in which individuals' repertoires of meaning-making resources develop as they interact with the world and with others. Grounded in an SFL approach, the successive chapters consider in turn the key stages of language development, from infancy to school settings to additional, second, and foreign language learning contexts. Each chapter incorporates a range of SFL studies to demonstrate shifts in language development across these stages, but also the discussion of other functional perspectives to examine the ways in which these different approaches inform one another. A concluding chapter considers the implications of these studies for future research as well as for pedagogical practices in literacy teaching. In its consideration of the relationship between SFL theory and its application to language development, this book will be key reading for students and scholars in Systemic Functional Linguistics, language and education, and literacy studies.

teaching textbooks 7: Representations of the World in Language Textbooks Karen Risager, 2018-01-08 This book presents a new and comprehensive framework for the analysis of representations of culture, society and the world in textbooks for foreign and second language learning. The framework is transferable to other kinds of learning materials and to other subjects. The framework distinguishes between five approaches: national studies, citizenship education studies, cultural studies, postcolonial studies and transnational studies. In a series of concrete analyses, the book illustrates how one can describe and uncover representations of the world in textbooks for English, German, French, Spanish, Danish and Esperanto. Each analysis is accompanied by suggestions of possible supplements and changes. The book points to the need for language learning materials to deal seriously with knowledge about the world, including its diversities and problems.

teaching textbooks 7: Language Textbooks in the era of Neoliberalism Pau Bori, 2018-02-15 This book examines how neoliberalism finds expression in foreign language textbooks. Moving beyond the usual focus on English, Pau Bori explores the impact of neoliberal ideology on Catalan textbooks. By comparing Catalan textbooks to English textbooks, this book interrogates the similarities and differences between a minor and a global language in the age of neoliberalism. Drawing on insights from critical theory and critical pedagogy, this study provides a fresh perspective on foreign language textbooks and second language education more broadly. *Language Textbooks in the Era of Neoliberalism* paves the way for new critical perspectives in language education that will challenge the current hegemony of neoliberalism.

Written in learner-friendly language, this textbook provides a rare how-to text for beginner qualitative researchers, and will be a valuable resource for upper undergraduate and postgraduate students on courses in applied linguistics, second/foreign language teaching, TESOL, literacy studies and related fields.

teaching textbooks 7: Sparta's German Children Helen Roche, 2013-12-31 From the eighteenth century until 1945, German children were taught to model themselves on the young of an Ancient Greek city-state: Sparta. From older children, from teachers in the classroom, and from higher authority first in Prussia, then in Imperial and National Socialist Germany, came images of Sparta designed to inculcate ideals of endurance, discipline and of military self-sacrifice. Identification with Sparta could also be used to justify ideas of domination over Germany's eastern neighbours. Helen Roche is the first to examine this still sensitive topic systematically and in depth. She collects and analyses official and published German evocations of Sparta but also, and remarkably, reconstructs the experiences of German children taught to be 'little Spartans' in the Prussian Cadet Corps and National Socialist elite schools, the Napolas. In treating the final, and

gravest, period of this process, the author has personally collected testimony from numerous surviving German witnesses who attended the Napolas as children in the early 1940s. That testimony is presented here, in a work which is likely to prove definitive, not only for its treasury of new information, but for its elegant - and humane - analysis.

teaching textbooks 7: God's Vision, Our Calling Janice Catron, 2003-01-01 From start to finish, the Bible indicates that there is an immediate connection between God's long-term vision and our immediate calling. Using Ephesians 4:1-6 as a base, award-winning Bible study writer and educator Janice Catron skillfully uses Old and New Testament passages to explore six aspects of our calling as Christians (relationship, choice, new identity, way of life, competence, and ministry) and how this calling relates to God's vision. Ideal for individual as well as group study, *God's Vision, Our Calling* includes reflection questions at the end of each chapter and the added feature of a pronunciation guide for Hebrew and Greek words. This concise and accessibly written book earnestly challenges us all to recapture God's vision for the world, the church, and ourselves.

teaching textbooks 7: Essays on Medieval Rhetoric Martin Camargo, 2018-02-06 Originally published between 1981 and 2003, the thirteen essays collected here cover topics in medieval rhetoric from its origins in late antiquity through the end of the Middle Ages. Most of the essays are concerned with the teaching of prose composition, especially the art of letter writing known as the *ars dictaminis*, and many of them focus on specific textbooks that were used for such instruction, in particular those composed in England from the twelfth through the fifteenth centuries. Individual essays are devoted to works by major figures such as Saint Augustine, Peter of Blois, and Geoffrey of Vinsauf; to teaching programmes at important academic centres such as Oxford and Bologna; and to such topics as the relationship between the art of letter writing and the art of poetry, the oral dimension of medieval epistolography, the manuscript traditions of influential textbooks, medieval genre terminology, and the position of medieval rhetoric within a continuous disciplinary history rooted in classical rhetoric.

teaching textbooks 7: The Use of Self Professor Emeritus of Social Work Raymond Fox, Raymond Fox, 2011-06 The finest teachers attempt to make direct connections between classroom knowledge and its application to the varieties of practice. Ray Fox emphasizes that a teacher of future practitioners must expand upon lectures and mere memorization; the interaction between teacher and student should substantially model ones that students are encouraged to employ with clients. The Use of Self presents an active, learner-centered process of professional education that emphasizes relationships and reflection in the classroom. The book shows how teachers can establish classroom environments of sharing, openness, challenge, and change. According to the author, the goal of higher education is to mold students into scientifically sophisticated, humane, and client-centered practitioners with knowledge grounded in discipline and skills anchored in art and compassion. This book will help professors accomplish this goal. Part 1 integrates conceptual knowledge with affective and experiential processes. These chapters focus on artistry and creativity in teaching. Part 2 describes methods to help students establish a sound professional identity and prepare for effective professional functioning. The author presents ways to involve students in adapting course content and direction so as to merge their styles of learning with the instructor's style of teaching, thus providing an environment conducive to shaping professional minds. Part 3 provides teaching methods and tools that promote reflection and encourage students to relate to classmates and, eventually, clients.
