teaching textbooks first grade: Teaching Multiplication with Lesson Study Masami Isoda, Raimundo Olfos, 2020-11-23 This open access book is intended to assist teachers, teacher trainers, curriculum designers, editors and authors of textbooks in developing strategies to teach the multiplication of natural numbers based on the experience of the Lesson Study in Japan. This approach to mathematics education dates back to the 1870s and reconciles the emphasis on problem solving with the treatment of the curricular contents. It has gained international recognition since the 1990s and thanks to it mathematics education in Japan has been recognized as one of the most efficient and innovative in the world. This growing international awareness has led to an effort to apply the principles of Lesson Study to other parts of the world and this book shows how experienced authors from Brazil, Chile, Mexico, Spain and Portugal have worked to adapt some of these methods and techniques to the Portuguese and Spanish speaking countries of Ibero-America. Drawing on the impact of Lesson Study on government curriculum decisions and teacher behavior in Japanese classrooms; offering examples of lessons, lesson plans and suggestions for teaching; and presenting examples of the good reception of the principles of Lesson Study in Ibero-America, Teaching Multiplication with Lesson Study – Japanese and Ibero-American Theories for Mathematics Education shows how an efficient and cutting-edge experience in mathematics education can travel the world and help teachers in many different countries.

teaching textbooks first grade: Nonfiction Craft Lessons JoAnn Portalupi, Ralph Fletcher, 2023-10-10 Writing nonfiction represents a big step for most students, yet when they try to create a report or persuasive essay, they are often anxious and frustrated. JoAnn Portalupi and Ralph Fletcher created Nonfiction Craft Lessons: Teaching Information Writing, K-8 to help teachers bring the passion from student writing while helping students scaffold their ideas in this challenging genre. The authors divided this book into grade-specific sections for K-2, 3-4, and middle school (grades 5-8) students. These divisions reflect various differences between emerging, competent, and

fluent writers. In each section you'll find a generous collection of craft lessons directed at the genre that's most appropriate for that particular age. In the K-2 section, for example, a number of craft lessons focus on the all-about or concept book. In the 3-4 section there are several lessons on biography. In the 5-8 section a series of lessons addresses expository writing. Throughout the book each of the 80 lessons is presented on a single page in an easy-to-read format. Every lesson features three teaching guidelines: Discussion --A brief look at the reasons for teaching the particular element of craft specifically in a nonfiction context. How to Teach It --Concrete language showing exactly how a teacher might bring this craft element to students in writing conferences or a small-group setting. Resource Material --Specific book or text referred to in the craft lesson including trade books, or a piece of student writing in the Appendixes. This book will help students breathe voice into lifeless dump-truck writing and improve their nonfiction writing by making it clearer, more authoritative, and more organized. Nonfiction Craft Lessons gives teachers a wealth of practical strategies to help students grow into strong writers as they explore and explain the world around them.
