wake tech textbooks: *The Future of the Book in the Digital Age* Bill Cope, Angus Phillips,

2006-12-31 With contributions from some of the world's leading authorities, this publication considers the future of the book in the digital age. As more books are published than ever before, this timely publication addresses a range of critically important themes relating to the book - including the present and future for publishing, libraries, literacy and learning in the information society. In the early 1990s the printed word appeared to be facing a terminal crisis, threatened from all sides by new media and other forms of entertainment. Subsequently the book has proved to be resilient in the face of these challenges, confounding the predictions of those who saw its replacement, whilst digital technology is providing mechanisms that enhance our ability to produce and distribute printed books. New developments, such as the growth of self-publishing and print on demand, and initiatives from major players such as Amazon and Google, mean that the printed book is in the middle of great changes. - Chapters by leading experts in the field of publishing studies and information science - A broad range of perspectives on key issues such as print on demand and digital publishing - Contributions from around the world

wake tech textbooks: *Electronic Expectations* Tony Stankus, 2000-04-18 Explore the future of Internet-based Science Journals! *Electronic Expectations: Science Journals on the Web* chronicles the convergence of financial, technical, and public policy considerations that turned what seemed like science fiction twenty years ago into a library fact of life today. The book shows that while electronic publication greatly speeds issuance of important scientific results of enduring value, it also has the potential to lower the economic threshold at which crank papers and marginal publications can gain a wide, if sadly misled audience, in the short run. In *Electronic Expectations*, editor Tony Stankus predicts with splendid irony that the electronic journals that will matter the most to genuine scientific progress will be the web versions of long-standing leaders among traditional print journals, whose electronic typesetting requirements gave the web its first format conventions and rules for safe content transmission. *Electronic Expectations* will empower you to: assess the existing print journal system and its prospects for improvement through electronic publishing discern the competing motivations and strategies of science researchers, librarians, publishers and journal aggregators in going electronic identify the web winners and losers after

these first ten years understand the underlying business and technological warfare affecting the larger future of the internet Electronic Expectations demonstrates that while scientists invented the web, they no longer control it, and that even the very largest research organizations, libraries, publishers, and journal aggregators, will, to a substantial degree, be at the technological and economic mercy of commercial users of the web.

wake tech textbooks: Recruiting, Training, and Retention of Science and Technology Librarians Patricia A. Kreitz, JoAnn DeVries, 2013-04-03 Since the 1950s there has been a persistent shortage of sci-tech librarians, and as more librarians retire or change positions, the prospect looms that the profession will only depopulate further. Tackling this difficult challenge, Recruiting, Training, and Retention of Science and Technology Librarians gathers together into one source the perspectives of top library administrators and managers as well as front-line librarians who present the latest research and practical strategies to find, train, and keep those valuable specialized professionals. This book explores in depth timely issues and presents creative perspectives and innovative solutions to this persistent problem in subject-specialized libraries. As the baby-boom generation of science and technology librarians begins to retire, training and keeping sci-tech librarians will become even more crucial. Recruiting, Training, and Retention of Science and Technology Librarians discusses the "replacement gap" problem in libraries, including who should be recruited, how they should be trained, and how to retain them once hired. Several authors address the field's long-standing specialist vs. generalist debate, bringing new data and experience-driven perspectives to this challenging issue. Topics in Recruiting, Training, and Retention of Science and Technology Librarians include: updating the cultural image of librarians to make the profession more appealing a comprehensive literature review how to cultivate candidates who are dedicated to service and love research and learning practical approaches to improve the visibility and attractiveness of science librarianship the skills and support needed to become a successful science librarian an innovative program to recruit undergraduates an in-depth survey of practicing science and technology librarians the challenges of science librarianship in Africa library and information science educators as recruiters for sci-tech librarians creative strategies to recruit and retain librarians adapting aspects of first-year student retention programs as a model for library retention programs how professional competencies can be used for recruitment, training, and retention and more Recruiting, Training, and Retention of Science and Technology Librarians is a timely, important resource for college and university administrators, and public, special, academic, and government librarians.

wake tech textbooks: ICIIS 2020 Asep Saepudin Jahar, Hamka Hasan, Didin Saepudin, Arif Zamhari, Yusuf Durachman, 2021-04-16 We are delighted to introduce the proceedings of the 3rd International Colloquium on Interdisciplinary Islamic Studies. It is annual event hosted and organised by the Graduate School of State Islamic University of Syarif Hidayatullah Jakarta. It was fully 2 days event 20-21 October 2020 by Virtual (online) mode with 3 keynotes speakers: Prof. Abdel Aziz Moenadil from the University of Ibn Thufail, Maroko, Prof Wael Aly Sayyed from the University of Ain Syams, Cairo, Mesir, and Assoc. Prof. Aria Nakissa, Ph.D. from Harvard University. The proceeding consisted of 41 accepted papers from the total of 81 submission papers. The proceeding consisted of 6 main areas of Interdisciplinary Islamic Studies. They are: Islam and medicine, Islam and Science and Technology, Islam and Psychology, Islam and Education, Quran and Hadits, and Islamic Studies with other various aspects. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections, and thereafter contributed to the improvement of the quality of the papers. Research in Islamic studies and Muslim societies today also increasingly uses interdisciplinary methods and approaches. In order to produce more objective findings, the researchers looked at the need to combine several methods or approaches to an object of study, so that they had additional considerations needed. These additional considerations add a more comprehensive perspective. In this way, in turn they can come up with better findings. Interdisciplinary Islamic studies dispute that Islam is monolithic, militaristic, and primarily Middle Eastern. We strongly believe that ICIIS conference has become a good forum for all researcher, developers, practitioners, scholars, policy makers, especially post graduate students to discuss their understandings of current processes and findings, as well as to look at possibilities for setting-up new trends in SDG and Islamic Interdisciplinary Studies. We also expect that the future ICIIS conference will be as successful and stimulating, as indicated by the contributions presented in this volume.
