uc davis textbooks: Academic Textbook Trends Mason Ross, AI, 2025-02-20 Academic

Textbook Trends explores the evolving world of educational resources in higher education, moving beyond traditional models. It examines how instructors and students adapt to digital learning, the rise of open educational resources (OER), and the impact of cost on student access. This academic textbook uniquely analyzes the shift in adoption patterns, pricing sensitivities, and the integration of digital learning platforms like learning management systems (LMS). For example, the book looks at how the increasing costs of traditional textbooks are pushing students and faculty toward more affordable learning solutions, such as e-books and courseware. The book approaches the topic by blending quantitative data from publisher reports and student surveys with qualitative insights from faculty interviews. It delves into specific areas such as textbook adoption across disciplines and the impact of OER initiatives. The book progresses logically, beginning with an introduction that sets the stage, followed by chapters analyzing data, and concluding with implications for the future of textbook development. This makes Academic Textbook Trends valuable for educators, administrators, and publishers seeking to enhance learning outcomes and ensure equitable access to educational materials in a rapidly changing landscape.

uc davis textbooks: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.
