west academic textbooks: Textbooks on Israel-Palestine Seyed Hadi Borhani, 2022-01-27 How is the Israel/Palestine question narrated in Western academia? What ideas dominate the key textbooks on the subject and what is presented as 'truth'? This book answers these critical questions. It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine. But academic support of Israel in the West has been a neglected issue, with Western academic knowledge being regarded as impartial and objective. This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel/Palestine question. Rather, knowledge has been biased, misleading, and dogmatic and Western college students are subscribing to 'factual histories' based on theories at best, if not fiction. The book is the first empirical investigation able to document this partial reporting of history. Seyed Hadi Borhani examines the most popular college-level textbooks used to teach the history of the Israel/Palestine in Western universities, combining 'textbook analysis' (to determine how the dominant academic texts report the question) and a 'context analysis' (to identify who 'manufactures' the dominant knowledge). The book provides a historical map of how the Israel-Palestine conflict is understood in the West. The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much-needed intervention into the state of affairs in Western academia.

west academic textbooks: From Dependence to Autonomy P.G. Altbach, V. Selvaratnam, 2012-12-06 This book is an example of an international editorial enterprise. The two editors, located in the United States and Singapore, coordinated a team of authors in ten countries. Linked by common concerns, the lengthy process of preparing such a complex volume proved to be a pleasantly cooperative task - proof that there is a kind of invisible college of colleagues working on similar topics in different countries. This book is also an indication that scholars from the Third World and the industrialized nations can work together in a spirit of equality and understanding.

This project has an interesting origin. It was first discussed at a conference on ASEAN - American higher education held in Malaysia in 1985, sponsored by the Regional Institute for Higher Education and Development, then headed by V. Selvaratnam and funded by the Asia Foundation and the Lee Foundation. At the time, geographical coverage was to be limited to the ASEAN nations. We also sought external funding, without success, to assist us in developing the project. Due to lack of funding, the project languished for a year. When one of our original participants, Andrew Gonzales of the Philippines, produced an essay, we decided to proceed without funding. We also decided to add several additional key Asian nations that we felt would provide additional analytic scope to the book. The result of this somewhat unusual collaborative effort is this volume.

west academic textbooks: Inclusive Access and Open Educational Resources E-text Programs in Higher Education Tracy A. Hurley, 2020-06-12 This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs' structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the United States, but there is little scholarship that engages on the topic of assessing these programs' effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.

west academic textbooks: Globalized Knowledge Flows and Chinese Social Theory Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization, especially with regard to Chinese social and cultural concepts. west academic textbooks: When Tibetan Meditation Goes Global Mara Lisa Arizaga, 2022-08-22 This book provides an in-depth examination of the Yungdrung Bon religion in light of globalization. In its global dimension, Bon has been attracting a growing number of Westerners, particularly to its Dzogchen teachings and meditation practices. In this expansion, Bon operates in a dynamic context where forces that create changes in the tradition coexist, sometimes in tension and sometimes in tandem, with other forces that aim to preserve it. In tracing the process through which Bon has become a global religion, this monograph narrates the story of the principal figures who initially facilitated this transmission, following their journey from Tibet to India and Nepal. The narrative then moves to explore the dynamics taking place in the transmission and reception of Yungdrung Bon in Western countries, opening up a new viewpoint on the expansion of Tibetan religious traditions into the West and painting a comprehensive picture of the modern history of the Yungdrung Bon religion as narrated by its participants. In so doing, it makes an invaluable contribution to the study of Tibetan traditions in the West as well as to the wider history of religions, social anthropology, psychology, and conversion studies.

west academic textbooks: Becoming Pro-Palestinian Rosemary Sayigh, 2024-02-22 This book brings together testimonials from people of different nationalities and professions who are 'pro-Palestinian', whether as scholars, film-makers, artists, musicians, activists, or NGO workers. Using what oral historians call the 'focused life history', renowned scholar, Rosemary Sayigh, invites her contributors to describe the experiences, events, motives and feelings that led them to support the Palestinian cause. The book is the first of its kind in Palestiniography and includes voices from countries across the world. A chapter is dedicated to each country and contributors are asked to reveal how they 'discovered' Palestine - given that Palestine is rarely mentioned in school textbooks or university courses - whether by travel, friendship, study, membership in a political party or book

group. They are also asked to detail what specific forms their engagement has taken - ranging scholarly, creative, militant, or charitable - and what their hopes are for the international solidarity movement. Finally, each contributor reflects on if they feel a just and equitable solution can ever be achieved for Palestinians, and if they accept the label 'pro-Palestinian' or would rather define their relationship to the Palestinians in some other way. With testimonies from both high profile and grassroots activists, the book is a rich and personal selection that reflects the diversity, dynamism and global nature of the movement for Palestine.
