textbooks unt: *Textbooks in Academic Libraries* Chris Diaz, 2018-12-03 Shortly after the syllabi are posted, and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core-course textbook reserve program; funding sources for starting or piloting a program; using aggregated enrollment, grade, and textbook cost data to identify high impact courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings, and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

Zerangue, 2019-11-11 Learn how to develop, manage, and maintain a scholarly communications department. More and more academic libraries are being asked to provide scholarly communications services to their campuses, ranging from general information about copyright law to instruction for creating and hosting digital repositories and publishing services. To support academic librarians and information specialists in starting their own scholarly communications departments, Sustaining and Enhancing the Scholarly Communications Department begins by introducing key scholarly communications concepts, including copyright, Creative Commons licenses, author rights, open access, open educational resources, open-access e-journals, and institutional repositories. Authors Helge, Tmava, and Zerangue explain how to develop, manage, market, and maintain a scholarly communications department. They define specific tasks and tools for which many scholarly communications departments are responsible, including intellectual property, licensing issues, promoting open access, data management, and plagiarism conundrums. They also discuss strategies for collaborating with key campus stakeholders and convey which academic degrees benefit and may be necessary for personnel in a scholarly communications department. Finally, the authors offer managerial and leadership techniques to increase employee productivity, efficiency, retention, motivation, and happiness within the scholarly communications department.

textbooks unt: Globalization on the Margins (2nd Edition) Iveta Silova, Sarfaro Niyozov, 2020-01-01 Reflecting on almost three decades of postsocialist transformations, the second edition of *Globalization on the Margins* explores continuities and changes in Central Asian education development since the dissolution of the Soviet Union in 1991, with a particular focus on the developments that took place since the production of the first edition in 2011. Rather than viewing these transformations in isolation, the authors place their analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. This new edition, in addition to a revised introduction and a newly added conclusion, consists of four thematic sections, each reflecting a key theme in the educational life of the Central Asian states. These thematic sections, introduction and conclusion collectively update our understanding of the recent developments and challenges in education of the five Central Asian states. They, however, go beyond mere information update, so as to complicate, re-engage, re-form and re-define the margins, taking up 'margins' a conceptual, geographic, cultural, and geo-political construct. Notwithstanding the diversity of local and international authors, variety of theoretical perspectives, methodological approaches, and conceptual lenses, the essays reveal the complexity and uncertainty of the post-socialist education transformations. Instead of portraying the transition process as the influx of Western ideas into the region, *Globalization on the Margins* provides new lenses to critically example education as a contested field of diverse perspectives, competing forces, and multidirectional flow of ideas, concepts, and reforms in Central Asia. ENDORSEMENTS: Hindsight famously brings clarity. And, much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly deeded over to historians. Nonetheless, we ignore that history at our peril. The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political, cultural, social and economic structures, relations, and practices that do the work of producing margins and centers in the first place. ~ Noah W. Sobe, Loyola University Chicago

Globalization on the margins and at the epicentre of the battles of the Great Powers. Two excellent educators, Sarfaro Niyozov and Iveta Silova, compiled a timely and long-awaited scholarly work based on empirical research in societies, which had similar history close to three decades ago. All the contributors are prolific educators who know the education system from within and without, who either hailed from the region or have spent a considerable amount of time to know the systems well. The book contains remarkable stories of education through the ups and downs of historical evolution. It is a must-read primer for anyone interested in learning about high quality research in the field of education in Central Asia. It is a huge contribution to educational research with an impact on research and teaching for years to come. ~ Duishon Shamatov, Nazarbayev University, Kazakhstan

The challenge of moving Central Asia from the borders of the Soviet Empire to the world's center is the focus of the discussions in 'Globalization on the Margins.' The transition to the Western models of education was happening in the context of major paradigm shift, which entire humanity was experiencing and which could be described as the arrival of the new post-industrial civilization. During this process, Central Asian countries have been pushed to the margins, because their contribution to the wealth of the new world know-how was much less pronounced than that of their Western neighbours. Therefore, investment into the research that contributes to local knowledge production seems a natural solution to the problem. All the contributors to this book have a vast experience in the region and many of their observations are thought provoking. This is a very insightful and much needed book. ~ Elena Lenskaya, Moscow School of Social and Economic Sciences, Russia

textbooks unt: Real-Time Environmental Monitoring Miguel F. Acevedo, 2023-09-29 Written 10 years after the publication of the first edition, this updated edition of Real-Time Environmental Monitoring: Sensors and Systems introduces the fundamentals of environmental monitoring based on electronic sensors, instruments, systems, and software that allow continuous and long-term ecological and environmental data collection. It accomplishes two objectives: explains how to use sensors for building more complex instruments, systems, and databases, and introduces a variety of sensors and systems employed to measure environmental variables in air, water, soils, vegetation canopies, and wildlife observation and tracking. This second edition is thoroughly updated in every aspect of technology and data, and each theoretical chapter is taught parallel with a hands-on application lab manual. Emphasizes real-time monitoring as an emerging area for environmental assessment and compliance and covers the fundamentals on how to develop sensors and systems Presents several entirely new topics not featured in the first edition, including remote sensing and GIS, machine learning, weather radar and satellites, groundwater monitoring, spatial analysis, and habitat monitoring Includes applications to many environmental and ecological systems Uses a practical, hands-on approach with the addition of an accompanying lab manual, which students can use to deepen their understanding, based on the author's 40 years of academic experience Intended for upper-level undergraduate and graduate students, taking courses in civil and environmental engineering, electrical engineering, mechanical engineering, geosciences, and environmental sciences, as well as professionals working in environmental services, and researchers and academics in engineering.

Its secret for longevity lies in those things that make it unique, such as its annual meeting that seems more like a social event or family reunion than a formal academic gathering. This book examines the Society's members and their substantial contributions to the field of folklore over the last century. Some articles focus on the research that was done in the past, while others offer studies that continue today. This book does more than present a history of the Texas Folklore Society: it explains why the TFS has lasted so long, and why it will continue.
