wolters kluwer textbooks: *How to Publish Academic Books: A Guide to Publishing Monographs, Edited Volumes, Textbooks, and Theses* Nitin Liladhar Rane, Saurabh Choudhary, Jayesh Rane, 2024-12-05 The academic book publishing sector has a key function when it comes to knowledge production and dissemination across various disciplines. For researchers, scholars, and educators, the process of moving from concept to publication is rarely a trivial task, and often involves the use of imagination, perseverance, and teamwork. Publishing a monograph, an edited volume or a textbook, or turning your thesis into a book can be painful. This book will help you demystify the world of academic book publishing, offering authors a guide to navigating the complicated process with success. This guide aims to provide authors with the knowledge of tools and resources needed to publish a book that reflects their research. If you want a sneak peek into the workings of scholarly publishing, it features advice from senior authors, publishers and academics with an intimate familiarity with the academic publishing process. Divided into chapters, the book covers the major elements of the publishing journey: steps to writing the proposal, advice on working with publishers, and challenges of the current moment, like open access and new fields of study. The first step to getting published is learning to write a scholarly manuscript or book proposal. Writers need to know how to present their research in front of potential publishers. It necessitates, then, not just a firm grasp on the work in question but a facility for conveying the relevance of the work and its potential to make a difference. Therefore, it is very important to tread carefully through the relationship with the publishers, as the success of publishing partnerships relies heavily on trust, collaboration, and shared vision for the book. Open access publishing for

scientific journals has played an increasingly important role in the ever-evolving academic world. There are new ways for authors to disseminate their work and increase the accessibility of research through open access. It is an exciting time to be an author, but it is also a challenging time in terms of financial viability and finding new publishing models. This section deeply studies the influence of open access so that authors can better develop books around it. Many students work years on their theses, and getting them published can greatly aid their academic careers. It is not simply editing; this means changing the format to suit for wider academic publication and conforming to the expectations of the publisher. This book is a road map for authors making this transition. For authors in emerging or interdisciplinary fields, publishing can bring unique challenges. There may not be established publishing pathways in these fields, or the intended audience may be smaller and more specialized. Despite these challenges, there are great rewards to publishing in such fields, and this book outlines strategies to achieve their success. Authors will discover how to seek the ideal publisher, determine their target market, and how to frame their work to have a noteworthy effect in their area. Technological advancements, global trends, and academic expectations have all combined to shape the future of academic book publishing. By the end of this book, readers will be equipped with a fundamental understanding of the academic publishing process. From preparing manuscripts and working with publishers to navigating new models of publishing, this guide arms authors with practical advice and strategies to ensure their research becomes a published book. It is our goal that this book helps those who hope to disseminate their research through publication of scholarly books.

wolters kluwer textbooks: Writers' Handbook 2021 J. Paul Dyson, 2021-04-12 The 2021 edition of firstwriter.com's bestselling directory for writers returns in a new, larger format, with more than twice as many listings of literary agents, literary agencies, book publishers, and magazines. It now contains over 3,000 listings, including revised and updated listings from the 2020 edition, and over 2,000 brand new entries. Finding the information you need is now quicker and

easier than ever before, with new tables and an expanded index, and unique paragraph numbers to help you get to the listings you're looking for. A variety of new tables help you navigate the listings in different ways, including a new Table of Authors, which lists over 3,000 authors and tells you who represents them, or who publishes them, or both. The number of genres in the index has exploded from under 100 in the last edition to over 500 in this one. So, for example, while there was only one option for "Romance" in the previous edition, you can now narrow this down to Historical Romance, Fantasy Romance, Supernatural / Paranormal Romance, Contemporary Romance, Diverse Romance, Erotic Romance, Feminist Romance, Christian Romance, or even Amish Romance. The new edition includes:

- 128 pages of literary agent and literary agency listings – that's more than the *Writer's Market* (75 pages) and the *Writers' & Artists' Yearbook* (39 pages) combined!
- 82 pages of book publisher listings, compared to 91 pages in the *Writers' & Artists' Yearbook* – but with a page size more than 70% larger this is like getting an extra 50 pages.
- 64 pages of magazine listings compared to 63 pages in the *Writers' & Artists' Yearbook*. Thanks to the difference in page size, this is the equivalent of 40 extra pages.

All in a book that is 30% cheaper than the *Writer's Market* (\$29.99 RRP), and 50% cheaper than the *Writers' & Artists' Yearbook* (£25.00 RRP). International markets become more accessible than ever, with listings that cover both the main publishing centres of New York and London, as well as markets in other English speaking countries. With more and more agents, publishers, and magazines accepting submissions online, this international outlook is now more important than ever. There are no adverts, no advertorials, and no obscure listings padding out hundreds of pages. By including only what's important to writers – contact details for literary agents, publishers, and magazines – this directory is able to provide more listings than its competitors, at a substantially lower price. The book also allows you to create a subscription to the firstwriter.com website for free until 2022. This means you can get free access to the firstwriter.com website, where you can find even more listings, and also benefit from other features such as advanced searches, daily email updates, feedback from users about the markets featured, saved searches, competitions listings, searchable personal notes, and more. "I know firsthand how lonely and dispiriting trying to find an agent and publisher can be. So it's great to find a resource like firstwriter.com that provides contacts, advice and encouragement to aspiring writers. I've been recommending it for years now!" ~ Robin Wade; literary agent at the Wade & Doherty Literary Agency Ltd, and long-term firstwriter.com subscriber

wolters kluwer textbooks: Inclusive Access and Open Educational Resources E-text Programs in Higher Education Tracy A. Hurley, 2020-06-12 This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs' structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the United States, but there is little scholarship that engages on the topic of assessing these programs' effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.
