free therapy workbooks: The Thinking, Doing and Believing Workbook Franklin Watkins, 2012-03 Much of the popular literature about depression, anxiety and stress says that these conditions are so complicated that we need experts to explain them to us. Some writers say they are diseases; we need medical experts to understand them. Some say they are disorders so that, in addition to medical experts we need behavioral experts to tell us how our brain works. Others say we need master teachers to explain the universal truths of Eastern religion before we can fully understand our troubling feelings. Is it really true that our feelings are so complicated that we must rely on scientists and philosophers to explain them to us? This workbook gives a clear answer: NO. The Thinking, Doing and Believing Workbook views depression, anxiety and stress as normal human feelings. The problem is not that we have these feelings, it is that we neglect the messages they convey. When we neglect them they disrupt our daily functioning and, if we persist in neglecting them, they can ruin the quality of our lives. The Developmental Approach presented in this workbook notes the many ways we actively contribute to our depressive, anxious and stressful feelings. This is important because if we participate in becoming distressed then we have the option of changing our behavior and replacing dysfunctional habits with more functional ones. This workbook is a map. If you use it, it may: - Help you understand what you have experienced and prepare you for what to expect. - Suggest skills you might want to use as you travel through strange terrain. - Find more creative ways to describe your emotional surroundings. - Orient you to the present moment. -

Provide glimpses of recovery so that you will recognize it when you make progress along your way.

free therapy workbooks: Counseling and Psychotherapy with Pentecostal and Charismatic Christians Geoffrey W. Sutton, 2020-09-17 The purpose of this book is to help mental health professionals increase their cultural competence to better serve Pentecostal and Charismatic Christians who are congregants in the world’s fastest-growing religious movement. My focus is twofold. First, I aim to increase the reader’s awareness and knowledge about Christians who live their faith within Pentecostal cultures. Second, I hope to increase the reader’s knowledge about the assessment and treatment of Pentecostal and Charismatic Christians with mental health needs based on a review of research and recommendations from experienced clinicians. My approach to assessment and treatment is the commonly held view that best practices are holistic. Therefore, I will attempt to integrate Pentecostal and Charismatic spirituality with assessment and treatment in ways that respect the spirituality of the person seeking treatment and enhances therapeutic outcomes. “The first part of the book can help all readers...understand people who live into that religion. The second part of the book is a practical and insightful guide to effective helping for psychological difficulties.
