free chinese workbooks: Get Ready For School Chinese Writing Workbook 1 W.Q. Blosh, 2020-05-19 How much time does a learner need to spend learning to write Chinese characters? Do you need to write every Chinese character that you learn? How many times do you need to write a Chinese character? Is it effective to write a full page of the same Chinese character repeatedly? How to remember all the strokes in a Chinese character easily? Your child will be able to Identify the PARTS (strokes and Chinese Alphabets) in Chinese characters. This will help to build a strong foundation for higher learning Learn in MULTIPLE WAYS - tracing, colouring, writing, visualising (or choose one way that suits your child) Understand the MEANING of the Chinese characters through PICTURES. (Pronunciation and English meaning included) Develop hand dexterity to write big and small characters (or focus on big characters first and finish the small characters later) CONTENT OF GET READY FOR SCHOOL CHINESE WORKBOOK 1 (EASY) 47 Chinese characters NOT more than 6 strokes (with 1 to 3 parts) Pictures for colouring Activities to recall characters learnt Blank handwriting papers METHODOLOGY Many learners dread Chinese writing drills - repeating pages and pages of the same Chinese characters. Writing can be fun if done moderately and in varied ways. Your child will be engaged because we Limit writing exercises to about 10 repetitions per character Create varied activities (e.g. varying word sizes, alternating between similar-looking characters, creating tracing and colouring options) Present strokes in cartoons with easy-to-remember names Provide more than one way to learn - trace, colour, write, visualise If your purpose is to develop the ability to RECALL the Chinese characters you learn, writing the characters is only one way to register them in your mind. More importantly, you need to be able to VISUALISE

it, that is able to see the components in the character, how they are combined and the order they are combined. In our books, we teach Chinese characters broken down into PARTS (not strokes only). A part can be a stroke or a Chinese Alphabet. A Chinese Alphabet is a repetitive component that is made up of 2 to 6 strokes. Learning Chinese Alphabets before learning Chinese characters helps to reduce memory work - don't remember a character by disintegrated strokes, remember it by PARTS (strokes and alphabets) and do it systematically. free chinese workbooks: **The Indigenization of Christianity in China I** Qi Duan, 2022-11-30 As the first volume of a three-volume set on the indigenization of Christianity in modern China, this book focuses on the presence of Christianity during the late Qing dynasty and the early twentieth century, discussing the early waves of Christian influence key watersheds in its history. Over the course of its growth in modern China, Christianity has faced twists and turns in its embedding in Chinese society and indigenous culture. This three-volume book delineates the genesis and trajectory of Christianity's indigenization in China over the course of the nineteenth and twentieth centuries, highlighting the actions of Chinese Christians and the relationship between the development of Christianity and modern Chinese history. In this volume, the author discusses early missionary works from both foreign missionaries and local churches, both of which were influential in rendering Christianity more present and influential in China and which paved the way for further indigenization. The book then expounds on the thoughts and practices of indigenizing Christianity prompted by historical events in the early twentieth century, including the independent movement of the Chinese Christian Church and religious reforms that were undertaken to reach greater accommodation with Chinese society. The book will appeal to scholars and students interested in the history of Christianity in China and modern Chinese history.

free chinese workbooks: A Social History of the Chinese Book Joseph P. McDermott, 2006-04-01 In this learned, yet readable, book, Joseph McDermott introduces the history of the book in China in the late imperial period from 1000 to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. 'A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.' - Timothy Brook, University of British Columbia 'Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in The Social History of the Book. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of *A Gentle Madness, Patience and Fortitude, A Splendor of Letters, and Every Book Its Reader* Joseph McDermott is presently Fellow of St John's College, Cambridge, and University Lecturer in Chinese at Cambridge University. He has published widely on Chinese social and economic history, most recently on the economy of the Song (or, Sung) dynasty for the Cambridge History of China. He has edited *State and Court Ritual in China* and *Art and Power in East Asia*.

Burston dec'd, Cyril Green, E Nicholas, A Dickinson, D Thompson, 2021-12-24 First published in 1972, Handbook for History Teachers is intended to be a general and comprehensive work of reference for teachers of history in primary and secondary schools of all kinds. The book covers all aspects of teaching history: among them are the use of sources, world history, art and history; principles of constructing a syllabus and the psychological aspects of history teaching. The bibliographical sections are arranged on three

parts: school textbooks, a section on audio-visual-aids and, finally, books for the teacher and possibly for the sixth form. It thoroughly investigates and critiques the various methods employed in teaching history within classrooms and suggests alternatives wherever applicable. Diligently curated by the Standing Sub-Committee in History, University of London Institute of Education, the book still holds immense value in the understanding of pedagogy.
