kumon workbooks preschool: Not Buying It Brett Graff, 2016-03-29
Most parents will do just about anything to secure happy lives and bright futures for their kids. Add in competition with other parents and near-constant pressure, their drive to give their kids the best of everything can backfire, setting back the child and the household finances. Brett Graff, *The Home Economist*, exposes how overspending can harm children by setting back intellect and encouraging narcissism, depression and unhealthy or unsafe habits. By unearthing research on pricey baby gear, oversized houses, so-called educational toys and after-school lessons, expensive sports equipment and private coaching, even certain organic products and unregulated natural medicines—she even has eye-opening findings on private schools versus public schools—Graff proves that we can spend too much getting our kids ahead and wind up instead setting them back. *Not Buying It* proves that sound, rational decision-making about spending is far more beneficial for our kids than purchases made out of fear, pressure and confusion. With Graff's guidance, you'll confidently create the financial strategy that's best for your family, not the one pushed by marketers or practiced by your neighbors. *Not Buying It* is your blueprint for emotional and financial freedom, and the stability your children deserve.

kumon workbooks preschool: Children as Treasures Mark Jones, 2020-03-17 Mark Jones examines the making of a new child's world in Japan between 1890 and 1930 and focuses on the institutions, groups, and individuals that reshaped both the idea of childhood and the daily life of children. Family reformers, scientific child experts, magazine editors, well-educated mothers, and other prewar urban elites constructed a model of childhood—having one's own room, devoting time to homework, reading children's literature, playing with toys—that ultimately became the norm for young Japanese in subsequent decades. This book also places the story of modern childhood within a broader social context—the emergence of a middle class in early twentieth century Japan. The ideal of making the child into a “superior student” (yutosei) appealed to the family seeking upward mobility and to the nation-state that needed disciplined, educated workers able to further Japan's capitalist and imperialist growth. This view of the middle class as a child-centered, educationally obsessed, socially aspiring stratum survived World War II and prospered into the years beyond.

kumon workbooks preschool: Multifaceted Assessment for Early Childhood Education Robert J. Wright, 2010 Multifaceted Assessment in Early Childhood is ideal for those on upper-division undergraduate courses and first-level graduate courses in early childhood education assessment. The book covers the various measures used in a range of assessment dimensions, and includes valuable information regarding young children with special needs and English Language Learners, which has rarely been touched upon in other textbooks. The chapters are focused on student accessibility and include practical applications of key concepts. Features and benefits: Covers a range of assessment concepts, including - Formative (uses feedback from learning to adapt teaching) -Summative (i.e. tests, quizzes) -Authentic (focuses on complex/deeper tasks) -Standardized (STAR, SAT) Includes coverage of assessment for English language learners and children with special needs -- topics that are not provided enough coverage in other books (including Wortham, McAfee, Puckett and Mindes). Wright's writing style grabs and engages the reader in the topic. Two of our reviewers who use Wortham specifically cited Wright's writing style as a reason they would adopt our book. A McAfee reviewer is likely to switch for the same reason.
