Research the Author

Look into the background of the author to ensure they have the appropriate credentials and experience in psychology or personal development. Authors with a strong professional background are likely to provide more credible and effective guidance.

Read Reviews

Check online reviews and testimonials from other users. This can provide insight into the workbook's effectiveness and whether it resonates with others who have similar goals.

self help workbooks for men: Positive Psychology Shane J. Lopez, 2008-08-30 Positive psychology is a movement that emphasizes what is right with people rather than what is wrong with them. Most of psychology tends to focus on negatives and mental illness. Positive psychology is an attempt to redress the balance and focus on the positive aspects of life (human strengths and virtues that are found in the happiest people). Positive psychology development programs are becoming commonplace in businesses, schools, and places of worship. Social scientists have learned more about how people respond to emotional experiences in productive ways. They now know more than they once did about curbing the effects of negative emotions, about making the most of positive emotions, and about how these practices lead to positive life outcomes. Given these discoveries, this set addresses the strengths, emotions, positive growth, and human flourishing of positive psychology. The essays expose the reader to the psychological findings that will shape positive psychology for decades to come. Each chapter is written with the goal of bringing research in positive psychology to life for the reader. The real-world implications of scholarship are communicated via anecdotes and case studies.

self help workbooks for men: Miss Behave Malebo Sephodi, 2017-06-06 Upon encountering historian Laurel Thatcher Ulrich's quote, 'well-behaved women seldom make history', Malebo Sephodi knew that she was tired of everyone else having a say on who and what she should be. Appropriating this quote, Malebo boldly renounces societal expectations placed on her as a black woman and shares her journey towards misbehavior. According to Malebo, it is the norm for a black woman to live in a society that prescribes what it means to be a well-behaved woman. Acting like this prescribed woman equals good behavior. But what happens when a black woman decides to live her own life and becomes her own form of who she wants to be? She is often seen as misbehaving. *Miss-Behave* challenges society's deep-seated beliefs about what it means to be an obedient woman. In this book, Malebo tracks her journey on a path towards achieving total autonomy and self-determinism. *Miss-Behave* will challenge, rattle and occasionally cause you to scream 'yassss, yassss, yassss' at various intervals.

Smith, 2007-12-12 Cosmopolitan Culture and Consumerism in Chick Lit examines the way in which the popular women's fiction genre of the late 1990s, known as chick lit, responds to women's advice manuals such as women's magazines, self-help books, romantic comedies, and domestic-advice manuals.

self help workbooks for men: Attraction Explained Viren Swami, 2015-12-22 How much does appearance matter in the formation of romantic relationships? Do nice guys always finish last? Does playing hard-to-get ever work? What really makes for a good chat-up line? When it comes to relationships, theres no shortage of advice from self-help experts, pick-up artists, and glossy magazines. But modern-day myths of attraction often have no basis in fact or worse are rooted in little more than misogyny. In 'Attraction Explained', psychologist Viren Swami debunks these myths

and draws on cutting-edge research to provide a ground-breaking and evidence-based account of relationship formation. At the core of this book is a very simple idea: there are no laws of attraction, no foolproof methods or strategies for getting someone to date you. But this isn't to say that there's nothing to be gained from studying attraction. Based on science rather than self-help clichés, *Attraction Explained* looks at how factors such as geography, appearance, personality, and similarity affect who we fall for and why.
