Therapy workbooks are structured documents designed to help individuals process their thoughts, feelings, and behaviors in a constructive manner. Often used by therapists, these workbooks provide exercises, prompts, and strategies that guide users through various therapeutic concepts. The printed or digital format of these workbooks allows individuals to engage with the material actively, making it a hands-on approach to mental health care.

Typically, therapy workbooks incorporate evidence-based practices from different therapeutic modalities, such as cognitive-behavioral therapy (CBT), dialectical behavior therapy (DBT), and mindfulness-based stress reduction (MBSR). This diversity of approaches makes therapy workbooks versatile tools for addressing a broad range of mental health issues, from anxiety and depression to relationship conflicts and trauma recovery.
